SHANGHAI DRUM SIEVE TYPE SDS

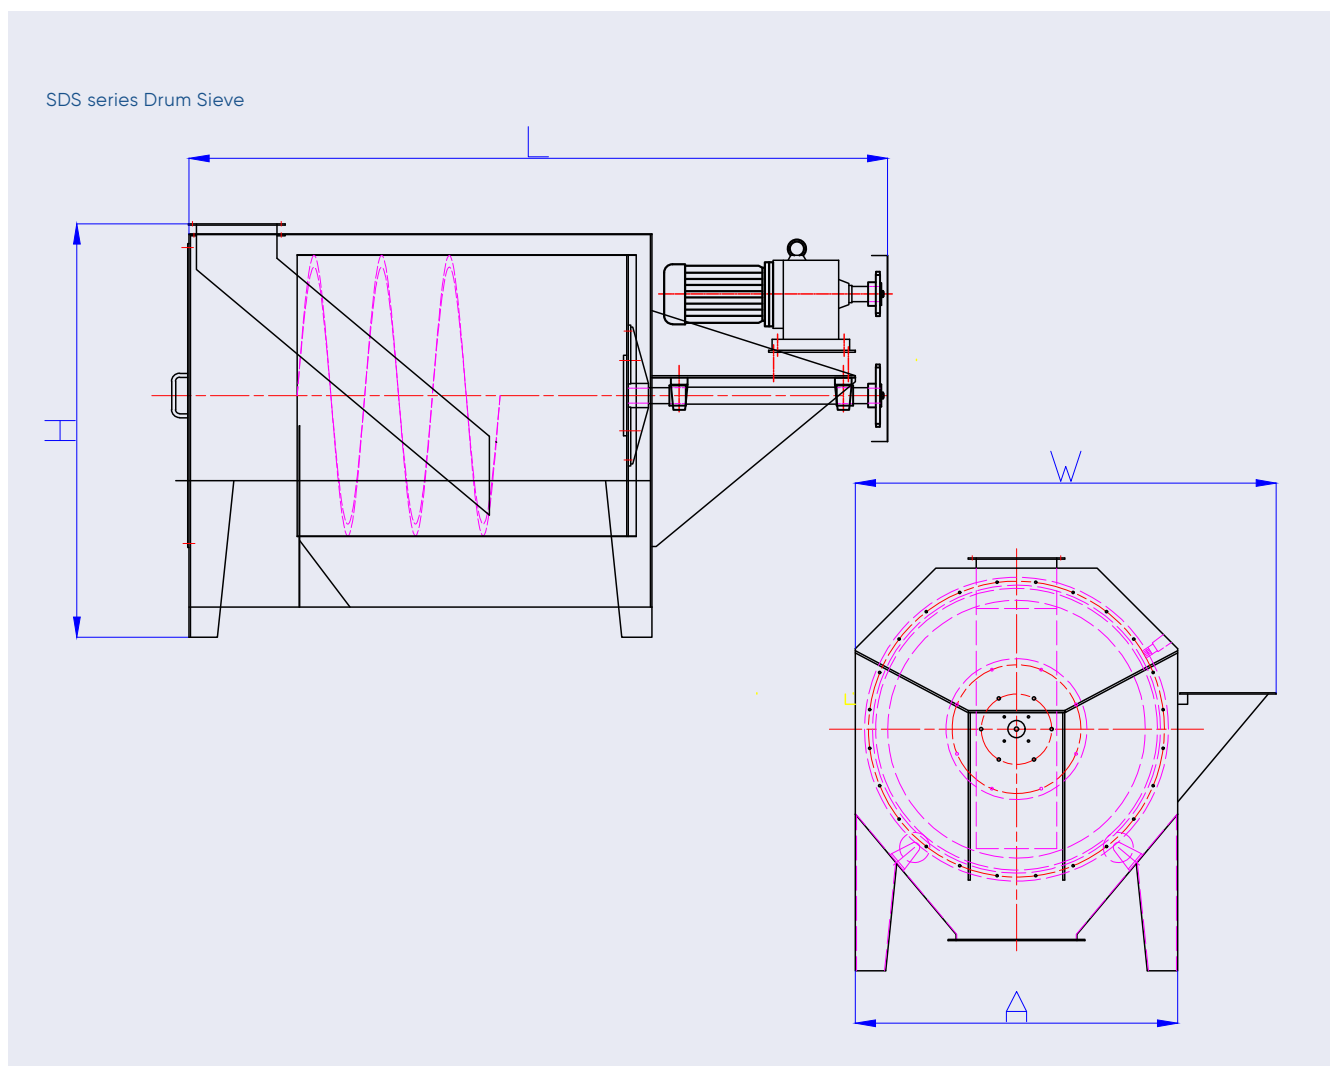

ANDRTZ

ENGINEERED SUCCESS

Precleaner for grain and meal

The ANDRITZ series drum sieve type SDS is the ideal technology for intake systems in animal feed, flour plants or grain storage facilities. The drum sieve provides safe separation of foreign objects like straw, rope, paper, stone, corn cobs, etc. from the raw materials. The drum sieve ensures subsequent processing equipment and processing lines receive clean, safe raw materials.

The type SDS sieve mesh can be customized to achieve different separation requirement.

Various sieve pores can be customized to reach the different separation requirement.

FEATURES

- A simple design structure that is easy to maintain
- Small footprint that is easy to install
- High capacity, low energy consumption
- Includes an aspiration system for easy cleaning
- Suitable for large impurity removal.
