

Technical Training

Training Center Vienna

Modern Infrastructure

Success guaranteed

Unsere Trainer verfügen über langjähriges Produkt- und Prozessknowhow.

Daher bieten wir Ihnen optimales praxisorientiertes Training.

Unser Trainingscenter befindet sich im Erdgeschoß unseres Firmengebäudes.

Er ist hell und freundlich ausgestattet und verfügt über modernste Infrastruktur sowie Geräte- und Medientechnik.

Der Standort ist sowohl mit öffentlichen Verkehrsmitteln als auch mit eigenem PKW gut erreichbar.

Verwenden Sie bitte tagsüber den Besucherparkplatz und achten Sie auf die Abschleppzonen.

Our trainers have many years of experience and an extensive product- and process know-how. Therefore we can supply an optimal praxis oriented training.

Our training center is located at ground floor in our company building. It is bright and friendly and includes modern infrastructure as well as high performance appliance- and media technique.

The location is easily accessible both with public transport and with own car.

During the day please use the customer car park and pay attention of tow-away zones.

The location is not convenient ?

You want a special workshop ?

Please contact us, we will agree to your requests and send you a tailor-made offer.

Workshops

Workshoptermine werden frei vereinbart. Die Inhalte sind individuell gestaltbar. Zu Fixkosten für den gesamten Workshop können Sie bis zu 6 Teilnehmer anmelden.

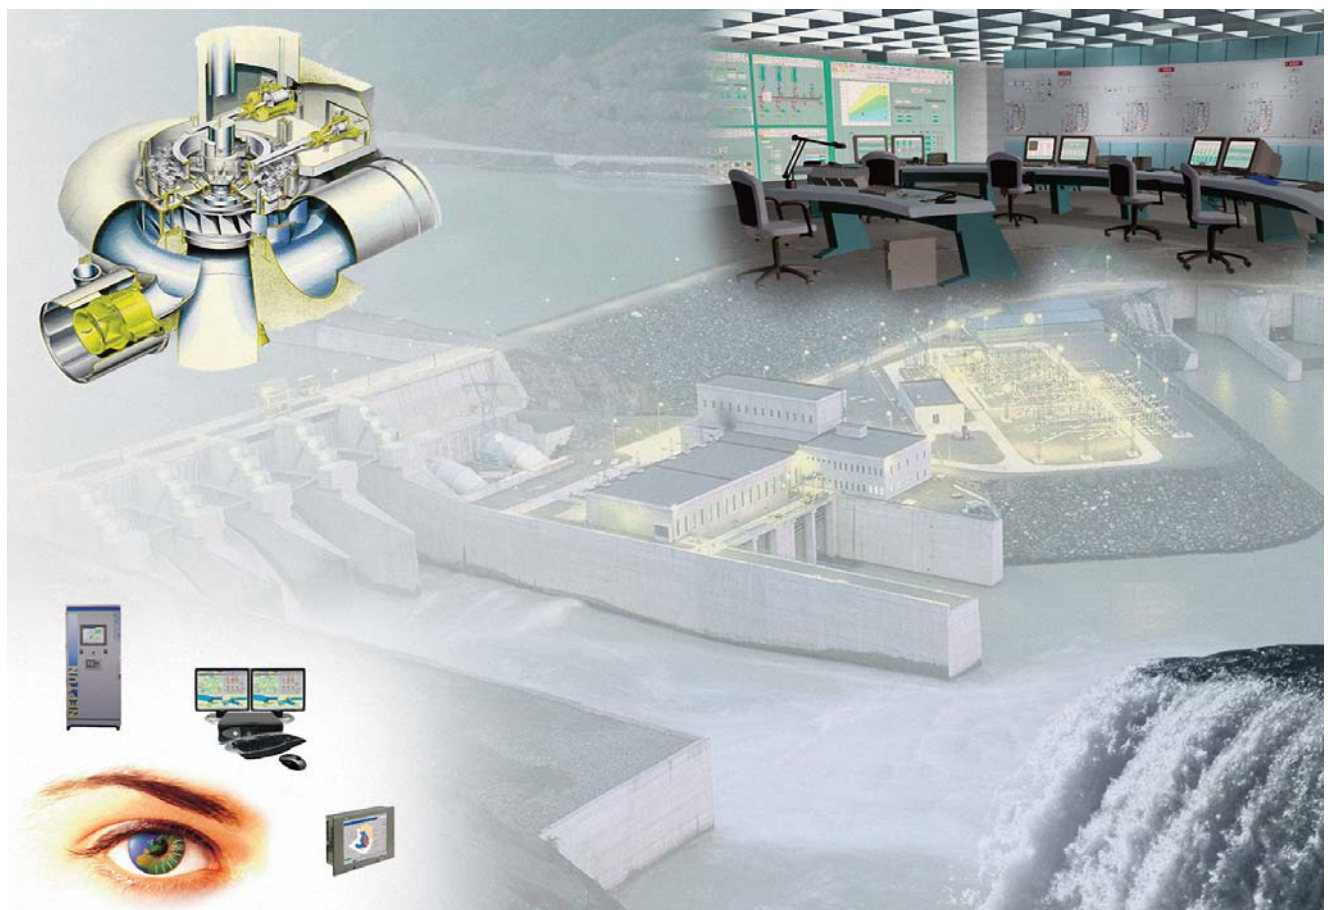

Workshops können sowohl am Firmenstandort als auch international vorort beim Kunden abgehalten werden.

Hiefür stellen wir eine voll ausgestattete mobile Trainingsanlage zur Verfügung.

Workshop schedule will be freely arranged. The contents can be designed individually. At fixed costs for the whole workshop you can register up to 6 participants.

Workshops can be held both at company site and also international on-site at customer's.

For this we provide a well equipped mobile training equipment.

Your Benefits

High Training Competence

- Product Know-How
- Process Know-How
- Automation Know-How
- Training experience

Costs optimized

- Courses at fixed costs per single attendee
- Workshops with fixed costs for groups
- Standard trainings
- Custom tailor made trainings

Location optimized

- Standard trainings at training center Vienna
- Customized workshops on-site
- International trainings with mobile equipment

NEPTUN - the integrated common solution for the secondary technology can offer notable advantages in course of plant expansion/refurbishment. That means integrated advantages in case of use of further systems (e.g. turbine governor, excitation, protection) additional to the existing benefits of your automation & control system.

- Powerful communication standard (IEC 60870-5-104)
- Common system concepts for remote functions
- Central engineering toolkit
- Simplification of the plant configuration
- Decrease of engineering- and documentation expenses
- Minimizing of additional infrastructure for signal intercommunication
- Minimizing of spare parts
- Liquidation of former fixed capital
- Reduction of local service and maintenance action
