

**What if ...**

... you could reduce your emissions by 25%?

**ECO**  *mode*

# Be one step ahead with ANDRITZ METALS

## Save energy and reduce emissions

The newly developed process for HCl acid regeneration plants represents the next big step in a series of improvements, and can not only be used for new installations, but also for existing plants. Attractive service packages to upgrade running systems are available, with low initial investment and including long-term support via remote diagnosis, effective personnel train-

ing and regular site visits from our experts. Our patented *ECOMode* demonstrates its enormous potential. Fuel consumption and emissions are reduced by 25%. Alternatively, you can ramp up your production by the same amount. On existing installations, the upgrade comprises of measures for both the equipment and the control software.

**Save energy, reduce emissions –  
be one step ahead!**

## System highlights

- 25% reduction in fuel consumption
- 25% reduction in emissions
- Attractive upgrade service packages
- Remote diagnosis
- Suitable for existing and new plants

## Choose us as partners

ANDRITZ METALS is one of the leading global suppliers of complete lines for the production and processing of stainless steel, carbon steel, and non-ferrous metal strip.

These lines consist of equipment for cold rolling, heat treatment, surface finishing, strip coating and finishing, punching and deep drawing, and for the regeneration of pickling acids. In addition, the business area sup-

plies turnkey furnace systems for the steel, copper, and aluminum industries, as well as laser and resistance welding equipment for the metalworking industry.
