The challenge

Inadequate maintenance service

Off-site refiner maintenance often results in unnecessarily long downtimes. Local service shops do not have the know-how required to identify problems that are not immediately obvious and can only provide routine maintenance without any means of enhancing refiner performance.

Worn wear parts

The ANDRITZ solution

On-site service – at your mill...

... prompt and reliable!

ANDRITZ knows your refiner best and offers prompt and reliable on-site service. The ANDRITZ service team has the appropriate training and specializes not only in replacing wear parts, but also in checking your refiner to identify areas with higher energy consumption, poor refining performance, and higher maintenance costs. We have the right process know-how to offer the best solution for your needs, regardless of the refiner model and design.

On site service

LC Refiner On Site Service

Benefits and features

More efficiency

- ▶ Water and energy savings
- ▶ Reduced maintenance costs

Higher reliability

- ▶ Less risk of a sudden fault
- ▶ High-quality wear parts in stock
- ▶ Impending difficulties identified at an early stage
- ▶ Detailed inspection report for future strategic planning

Better maintainability

- ▶ Prompt response times
- ▶ Brief downtimes
- ▶ Faster standard maintenance operations
- ▶ Less in-house maintenance work required

Higher productivity

- ▶ Improved fiber quality
- ▶ Longer service intervals
- ▶ Better performance
