

ModuScreen A

Screening and Fractionation

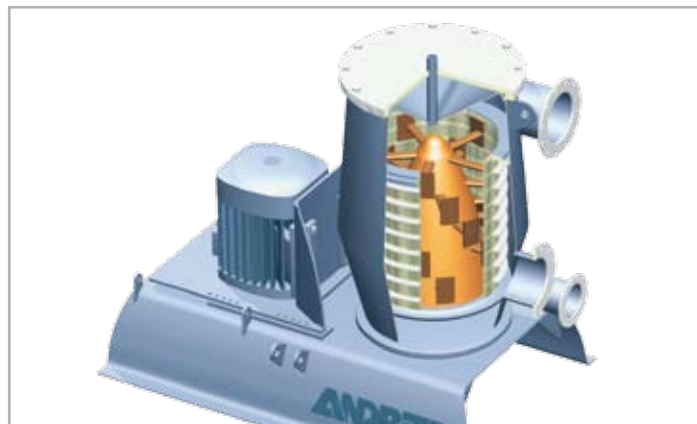

ModuScreen A

Highest reliability in all applications

The ANDRITZ ModuScreen A can be installed in MC and LC applications for screening and fractionation for all kind of furnishes:

- in recycled fiber applications as coarse screen, MC/LC fine screen and fractionator
- in virgin and mechanical pulp applications as MC/LC fine screen
- in thick stock screening

Benefits

- **High screening efficiency due to advanced basket/rotor design**
- **Low energy consumption saves on operating costs**
- **Optimized hydraulic flow patterns improve runability**
- **Flexible basket/rotor combinations allow easy and quick adaptations for different raw materials**
- **Lower maintenance costs due to minimum spare parts requirement**
- **Common base for screen and motor saves installation costs**
