## **ASIT – ANDRITZ Smart Industrial Technology** Business partner seminar

The so-called fourth industrial revolution, or „Industry 4.0“, is in the focus of the industry more and more. Digital networking and automation are on the advance and will transform the design, manufacture, operation, and servicing of products and production systems. In the pulp and paper industry, one main goal is to achieve the highest possible productivity, quality, and sustainability in production.

Smart technologies – supporting connectivity and interaction between machines, equipment, and human beings – will make production systems faster and more efficient.

ANDRITZ Smart Industrial Technologies (ASIT) is our solution to tackling this challenge. Interested in learning more? Come and join our seminar.

We cordially invite you to attend the **ANDRITZ business partner seminar ASIT – ANDRITZ Smart Industrial Technology**, which will take place prior to the PRIMA Conference 2016 at the Park Royal Palace Hotel in Vienna.

May 9, 2016, 9:00-12:00  
Vienna, Austria

### **Our program features**

- Concept for life-cycle management by ANDRITZ AUTOMATION
- ANDRITZ OPP – Optimization of Process Performance
- SMART Simulation for sustainable training and plant operation

As our guest, please take advantage of the ANDRITZ special rate for the subsequent PRIMA Conference 2016:
