

FEED & BIOFUEL
HAMMER MILL
TYPE OPTIMILL 500-700-900

High capacity hammer mill for fine to coarse grinding of feeds. The advantages of the Optimill hammer mill series, which ensure optimum grinding in the production line, are:

- Optimum particle size distribution
- High capacity
- Low speed
- Reduced noise level
- Energy-saving closed rotor design
- Staggered hammer rows for optimum coverage of the screen area
- Reversible direction of rotation
- Hammer turning in rows
- Large sliding doors allow free access for maintenance
- Controlled material feeding and distribution
- Temperature monitoring of bearing.

ANDRITZ

FEEDER SYSTEM ENSURES EVEN MATERIAL DISTRIBUTION

Material feeding over the entire grinding chamber length ensures control of particle size and gives uniform load on screens and hammers. Screw feeders are double screw type mounted over the separator. The load-dependent hammer mill feeder system is an integrated part of the ANDRITZ hammer mill control A-HM1, which ensures optimum grinding performance and maximum energy utilization.

ADDITIONAL EQUIPMENT

- Temperature monitoring in grinding chamber

ACCESSORIES

- Feeder system
- Hammer mill control
- Discharge plenum
- Operating platforms
- Aspiration filter
