

**PULP & PAPER**

# **ModuScreen A**

**EFFICIENT SCREENING AND FRACTIONATION  
FOR ALL TYPES OF FURNISHES**

The ModuScreen A is part of the highly successful ModuScreen family of ANDRITZ pressure screens and is perfectly suitable for processing all types of furnishes. The screen can be applied in stock preparation systems

for recycled fiber applications as MC/LC fine screen and fractionator or in virgin and mechanical pulp systems as MC/LC fine screen and also as thick stock screen. Due to its advanced basket and rotor

design and the special double-conical housing, the ModuScreen A achieves high screening efficiency and optimum hydraulic flow patterns for excellent runability.

**ANDRITZ**

**ENGINEERED SUCCESS**

# Excellent reliability in fine screening and fractionation

## BENEFITS:

- High screening efficiency due to advanced basket and rotor design
- Low energy consumption saves on operating costs
- Optimized hydraulic flow patterns improve runability
- With flexible basket and rotor combinations, the unit can be adapted quickly and easily to suit different raw materials
- Common base for screen and motor, thus saving installation costs

ANDRITZ ModuScreen A screens are available in eight sizes, featuring installed power up to 355 kW.
