

**PULP & PAPER**

# **ModuScreen F**

**EFFECTIVE SCREENING/FRACTIONATION  
FOR THE ENTIRE CAPACITY RANGE**

The ModuScreen F is part of the highly successful ModuScreen family of ANDRITZ pressure screens and is well-proven in various applications for low, medium and high consistency. ANDRITZ offers a full range of

different rotors, which are available with or without dilution facility to handle even highly demanding process conditions. This ensures excellent runability with best screening results at a consistency range from

1.0% up to 4.5%. Screen cylinders cover a wide range of drilled hole and slotted wedge wire baskets. Any pulp grade can be processed by choosing the most suitable combination of screen basket and rotor.

**ANDRITZ**

**ENGINEERED SUCCESS**

# Screening/fractionation even under demanding conditions

## BENEFITS:

- Advanced rotor and screen basket design allows high screening efficiency
- Excellent runability
- Modular design
- Easy to operate and maintain
- Special rotor available with patented dilution facility in order to meet highly demanding process conditions

The ModuScreen F screen is operating worldwide very successfully in the screening stages of recycled fiber, broke, thick stock and mechanical pulping systems and is used as a fractionator or for fiber recovery in water systems.

The screen is available in seven sizes, featuring installed power up to 355 kW.

- 1 Stock inlet
- 2 Accept discharge
- 3 Reject discharge
- 4 Dilution
