ANDRITZ to supply three FibreFlow drum pulping systems to Dongguan Jianhui Paper, China

Graz, December 22, 2017. International technology Group ANDRITZ has received an order from Dongguan Jianhui Paper to install three FibreFlow drum pulping systems at the mill in Dongguan, Guangdong Province, China. Start-up is scheduled for the second quarter of 2018.

The scope of supply comprises a FibreFlow drum pulping system for the 300 bdt/d stock preparation line for the top ply, which uses ONP (Old Newspaper Pulp) as raw material. Two additional FibreFlow drum pulping systems will be installed for production of the filler ply in two parallel lines that process MOW (Mixed Office Waste) with a total capacity of 1,400 bdt/d. The new pulping processes include steam heating and high-density cleaning and will replace the existing low-consistency pulping systems.

Dongguan Jianhui Paper, established in December 2002, produces up to 600,000 tons of high-quality, white coated duplex board with gray back and up to 410,000 tons of test liner per year.

The ANDRITZ GROUP

ANDRITZ is a globally leading supplier of plants, equipment, and services for hydropower stations, the pulp and paper industry, the metalworking and steel industries, and for solid/liquid separation in the municipal and industrial sectors as well as for animal feed and biomass pelleting. Other important business segments include automation and service business. In addition, the international Group is also active in the power generating sector (steam boiler plants, biomass boilers, recovery boilers, and gasification plants) and in environmental technology (flue gas cleaning plants) and offers equipment for the production of nonwovens, dissolving pulp, and panelboard as well as recycling plants. The publicly listed technology Group is headquartered in Graz, Austria, and has a staff of approximately 25,700 employees. ANDRITZ operates more than 250 sites in over 40 countries.

ANDRITZ PULP & PAPER

ANDRITZ PULP & PAPER is a leading global supplier of complete plants, systems, equipment, and comprehensive services for the production and processing of all types of pulp, paper, tissue, and cardboard. The technologies cover the processing of logs, annual fibers, and waste paper; the production of chemical pulp, mechanical pulp, and recycled fibers; the recovery and reuse of chemicals; the preparation of paper machine furnish; the production of paper, tissue, and cardboard; the calendering and coating of paper; as well as the treatment of reject materials and sludge. The service offering includes system and machine modernization, rebuilds, spare and wear parts, on-site and workshop services, optimization of process performance, maintenance and automation solutions, as well as machine relocation and second-hand equipment. Biomass, steam, and recovery boilers, as well as gasification plants for power generation, flue gas cleaning plants, plants for the production of nonwovens, dissolving pulp, and panelboard (MDF), as well as recycling plants are also part of this business area.
