Over 30 years of pelleting and still improving. See the latest features:

- Left hand or right hand solid stainless steel door = no corrosion issues.
- Hardened gears, (bull gear is reversible to extend life).
- Removable cartridge assembly = change from pellets to cubes rapidly
- Tapered die fit, reversible die = change die in short time
- Major pelletmill components = hardened stainless steel = compact size, high strength
- Split tapered die wear rings = no tools needed for replacement
**ADDITIONAL FEATURES & BENEFITS:**
- Mill is designed and built in complete imperial units = no special metric threads
- Up to 400HP can be applied
- Two gearsets available = when need to slow mill for cubes
- Large tapered roller bearings for drive loads
- Dedicated roller bearing to handle pelleting loads
- Variety of roll shell designs from Ruftex™, corrugated, dimpled
- Adjustable feed plow to feed die evenly

**ANDRITZ MANUFACTURING & SERVICE:**
- ANDRITZ manufactures its own dies so there is one source to contact
- ANDRITZ has a staffed service department with trained mechanics
- Manufacturing and engineering at same location in Muncy PA

**OPTIONS:**
- Hoist with tools to assist with die and roll assembly changes
- Centrifeeder to provide even feed to roll assemblies and maximize bearing, rollshell and die life
- Auto-greasing system for roll and main bearings
- Water or air oil cooling
- Carrier cart and pedestals for faster cartridge changes
- Conditioner with optional liquid(s) and/or steam addition
- Automatic roll adjust (2 roll pellet mill)
