

## PRESS RELEASE

# ANDRITZ to supply first Caribbean recycling plant

*GRAZ, JULY 16, 2018.* ANDRITZ MeWa, a part of international technology Group ANDRITZ, has received an order from Cibao Metal Recycling CIMER Srl, a subsidiary of the YeYo Ochoa Group, Dominican Republic, for supply of a complete three-in-one recycling plant. It will be the first multi-functional and comprehensive recycling plant for metals and metal compounds in the Caribbean and Latin American region. Start-up is scheduled for the end of 2018.

The scope of supply comprises a compact package solution for the processing of three different input materials: car and truck oil filters, automotive parts, and electronic scrap. The equipment supplied consists of a Universal Rotary Shear UC 1300, a Universal Granulator UG 1000H, a Universal Cross-Flow Shredder QZ 1200, and the complete materials handling and separation technology.

The plant is designed to process up to one ton per hour of oil filters, two tons per hour of electronic scrap, and approximately five tons per hour of car parts and metal sheets. The oil filters are shredded down to a particle size of less than 30 mm and separated into three basic output materials: roughly 40% metals, 20% centrifuged motor oil, and 40% rubber and paper, which comes out dry and fluffy. The design of the recycling plant is such that it can be extended at a later stage to process further materials.

The YeYo Ochoa Group, based in Santiago de Caballeros, is active in a broad range of businesses, including water treatment and oil production, construction, transportation, and truck maintenance.

## **ANDRITZ GROUP**

ANDRITZ is a globally leading supplier of plants, equipment, and services for hydropower stations, the pulp and paper industry, the metal working and steel industries, and for solid/liquid separation in the municipal and industrial segments. Other important fields of business are animal feed and biomass pelleting, as well as automation, where ANDRITZ offers a wide range of innovative products and services in the IIoT (Industrial Internet of Things) sector under the brand name of Metris. In addition, the international technology Group is active in power generation (steam boiler plants, biomass power plants, recovery boilers, and gasification plants) and environmental technology (flue gas cleaning plants) and offers equipment for the production of nonwovens, dissolving pulp, and panelboard, as well as recycling plants.

A passion for innovative technology, absolute customer focus, reliability, and integrity are the central values to which ANDRITZ commits. The listed Group is headquartered in Graz, Austria. With over 160 years of experience, 25,800 employees, and more than 250 locations in over 40 countries worldwide, ANDRITZ is a reliable and competent partner and helps its customers to achieve their corporate and sustainability goals.

## **ANDRITZ PULP & PAPER**

ANDRITZ Pulp & Paper is a leading global supplier of complete plants, systems, equipment, and comprehensive services for the production and processing of all types of pulp, paper, board, and tissue. The technologies cover processing of logs, annual fibers, and waste paper; production of chemical pulp, mechanical pulp, and recycled fibers; recovery and reuse of chemicals; preparation of paper machine furnish; production of paper, board, and tissue; sizing, calendering and coating of paper; as well as treatment of reject materials and sludge. The service offering includes system and machine modernization, rebuilds, spare and wear parts, on-site and workshop services, optimization of process performance, maintenance and automation solutions, as well as machine relocation and second-hand equipment. Biomass, steam and recovery boilers for power production, gasification and flue gas cleaning plants, systems and plants for the production of nonwovens, dissolving pulp, and panelboard (MDF), as well as recycling and shredding solutions for various waste materials also form a part of this business area.
