

Apprenticeship to CAD Designer/Design Engineer (m/f)

WE WANT YOU!

RESPONSIBILITIES

As Design Engineer you will create drawings for various machines and plant components and perform detail calculations for different structures. You will use CAD programs and other modern software often. Your design ideas and calculations will contribute to new developments and increasing efficiency and performance of our plants and machines.

QUALIFICATIONS

- High school graduation
- Basic technical understanding
- Well developed spatial visualization skills
- Fast comprehension, teamwork, and willingness to further your education
