

Apprenticeship to Metals Engineering Technician/Machining Technician (m/f)

WE WANT YOU!

RESPONSIBILITIES

As Machining Technician you operate CNC (Computerized Numerical Control) machines and fabricate complex components with very high precision. After extensive basic training you will use the newest mill and lathe machines and learn all the skills you need to independently fabricate incredibly high-tech and complex components.

QUALIFICATIONS

- High school graduation
- Well-developed spatial visualization skills
- Basic technical understanding
- Clean, precise and reliable work
- Fast comprehension, teamwork, and willingness to further your education

OUR OFFER:
