

## Apprenticeship to Materials Technician (m/f)

### RESPONSIBILITIES

As a Materials Technician you use tools such as calipers, microscopes, x-ray machines, and ultrasounds to study metals and synthetic materials. You take samples and determine the strength and hardness of the materials. For these tests you operate physical-technical machines to collect data and then analyze it.

### QUALIFICATIONS

- High school graduation
- Interest in physical-technical processes
- Clean, precise and reliable work
- Fast comprehension, teamwork, and willingness to further your education

WE WANT YOU!

### OUR OFFER:
