

PRESS RELEASE

ANDRITZ to supply spunlace plant to Sheng Hung, Taiwan

GRAZ, NOVEMBER 19, 2018. International technology Group ANDRITZ has received an order from Sheng Hung Industrial Co., Ltd., based in Taiwan, to supply a complete spunlace plant to be installed at their site in Taoyuan. This latest investment is now Sheng Hung's fourth ANDRITZ spunlace line and it will enable the company to further innovate its product offerings for specialty nonwovens and heavyweight fabrics. The line will start production in the second quarter of 2019.

The flexible, crosslapped web-forming plant delivered by ANDRITZ will produce multiple grades from 30 to 400 gsm and will be equipped with an engineered, high-quality aperturing/patterning solution delivered together with a Jetlace Avantage C hydroentanglement unit. The line will be completed by an efficient neXdry Avantage through-air dryer and an ANDRITZ filtration system, and thus will be able to meet the stringent local environmental requirements.

Over the past 60 years, Sheng Hung has become a market leader in the Far East for value-added, engineered nonwovens in the fields of medicine, synthetic leather, stretchable webs, and recently developed, unique fabrics for fine-art printing with a proprietary technology and used in interior decoration. *"We are expanding our business opportunities while maintaining our core competences in order to create added value for our products. Our advanced quality control management and environmentally friendly products are also certified according to ISO-14001 and ISO-50001,"* says Keynese S. C. Chen, President of Sheng Hung.

ANDRITZ GROUP

ANDRITZ is a globally leading supplier of plants, equipment, and services for hydropower stations, the pulp and paper industry, the metal working and steel industries, and for solid/liquid separation in the municipal and industrial segments. Other important fields of business are animal feed and biomass pelleting, as well as automation, where ANDRITZ offers a wide range of innovative products and services in the IIoT (Industrial Internet of Things) sector under the brand name of Metris. In addition, the international technology Group is active in power generation (steam boiler plants, biomass power plants, recovery boilers, and gasification plants) and environmental technology (flue gas cleaning plants) and offers equipment for the production of nonwovens, dissolving pulp, and panelboard, as well as recycling plants.

A passion for innovative technology, absolute customer focus, reliability, and integrity are the central values to which ANDRITZ commits. The listed Group is headquartered in Graz, Austria. With over 160 years of experience, 29,000 employees, and more than 280 locations in over 40 countries worldwide, ANDRITZ is a reliable and competent partner and helps its customers to achieve their corporate and sustainability goals.
