ANDRITZ receives order to supply tissue machine to Berli Jucker Cellox, Thailand

GRAZ, NOVEMBER 22, 2018. International technology Group ANDRITZ has received an order from Berli Jucker Cellox Ltd. to supply a *PrimeLineCOMPACT VI* tissue machine with shoe press, including stock preparation and automation systems, for their mill in Prachinburi, Thailand. The machine is designed for grammages from 13 to 40 g/m² used for all kinds of high-quality tissue and towels.

The tissue machine has a design speed of 1,800 meters per minute and a paper width on reel of 2,800 mm. It is equipped with the ANDRITZ *PrimeControl* automation system for an optimized production process.

The combination of a 16 ft. *PrimeDry* Steel Yankee and the latest *PrimePress XT Evo* shoe press technology enables a high drying capacity and achieves remarkable cost savings and operational flexibility as well as improved product quality.

The scope of supply also includes the stock preparation system, with two lines in order to process both short-fiber and long-fiber pulp, and the option of adding recycled fiber. Additionally, it is equipped with an approach flow system and Dissolved Air Flotation (DAF) for fiber recovery. The installed water system is designed to minimize water consumption, thus ensuring highest efficiency.

"Due to the intensive R&D activities at the new ANDRITZ PrimeLineTIAC tissue pilot plant in Graz, we believe that ANDRITZ is the right partner to provide the expertise and equipment for a high-quality tissue production line, for example the latest shoe press technology PrimePress XT Evo that provides high productivity and product quality as well as the PrimeDry Steel Yankee that enables high efficiency of resources," says the senior management of Berli Jucker Cellox Ltd.

This order once again confirms ANDRITZ's strong market position as one of the leading suppliers of machines and systems to the Asian tissue industry.

ANDRITZ GROUP

ANDRITZ is a globally leading supplier of plants, equipment, and services for hydropower stations, the pulp and paper industry, the metal working and steel industries, and for solid/liquid separation in the municipal and industrial segments. Other important fields of business are animal feed and biomass pelleting, as well as automation, where ANDRITZ offers a wide range of innovative products and services in the IIoT (Industrial Internet of Things) sector under the brand name of Metris. In addition, the international technology Group is active in power generation (steam boiler plants, biomass power plants, recovery boilers, and gasification plants) and environmental technology (flue gas cleaning plants) and offers equipment for the production of nonwovens, dissolving pulp, and panelboard, as well as recycling plants.

A passion for innovative technology, absolute customer focus, reliability, and integrity are the central values to which ANDRITZ commits. The listed Group is headquartered in Graz, Austria. With over 160 years of experience, 29,000 employees, and more than 280 locations in over 40 countries worldwide, ANDRITZ is a reliable and competent partner and helps its customers to achieve their corporate and sustainability goals.

ANDRITZ PULP & PAPER

ANDRITZ Pulp & Paper is a leading global supplier of complete plants, systems, equipment, and comprehensive services for the production and processing of all types of pulp, paper, board, and tissue. The technologies cover processing of logs, annual fibers, and waste paper; production of chemical pulp, mechanical pulp, and recycled fibers; recovery and reuse of chemicals; preparation of paper machine furnish; production of paper, board, and tissue; sizing, calendering and coating of paper; as well as treatment of reject materials and sludge. The service offering includes system and machine modernization, rebuilds, spare and wear parts, on-site and workshop services, optimization of process performance, maintenance and automation solutions, as well as machine relocation and second-hand equipment. Biomass, steam and recovery boilers for power production, gasification and flue gas cleaning plants, systems and plants for the production of nonwovens, dissolving pulp, and panelboard (MDF), as well as recycling and shredding solutions for various waste materials also form a part of this business area.
