

PRESS RELEASE

ANDRITZ to supply process technology for fiberline modernization to Iggesund Paperboard, Sweden

GRAZ, DECEMBER 21, 2018. International technology Group ANDRITZ has received an order from Holmen's Iggesund Paperboard to supply fiberline process technology and equipment to their Iggesund mill, Sweden. Start-up is scheduled for the fourth quarter of 2019.

The technology supplied by ANDRITZ will substantially contribute towards reducing emissions further and result in environmentally friendly, high-quality pulp production.

ANDRITZ's scope of supply encompasses:

- Modernization of the brownstock washing process, including a new multi-stage DD-Washer with compact layout
- A new oxygen delignification stage for optimizing the kappa level to achieve highest possible yield and minimum chemical consumption
- Relocation of the existing screening process after the oxygen delignification stage in order to minimize fiber losses
- Bleaching plant modernization by changing the existing 5-stage bleaching system to 4-stage bleaching
- Cooler for digester blow temperature control

ANDRITZ has several hundred very successful DD-Washer installations as references around the globe. ANDRITZ DD-Washers are characterized by lowest operating costs and emissions as well as extremely good washing efficiency, based on the required number of displacement washing stages in a single unit. The DD-Washer is also very gentle to fibers, retaining all the bulk, stiffness and strength of the pulp as there is no mechanical pressing during pulp washing.

Iggesund Paperboard produces paperboard for consumer packaging and graphics printing at one mill in Sweden and one in England. The company is Europe's leading producer of high-quality, virgin-fiber paperboard for use in the premium packaging and graphics sectors.

ANDRITZ GROUP

ANDRITZ is a globally leading supplier of plants, equipment, and services for hydropower stations, the pulp and paper industry, the metal working and steel industries, and for solid/liquid separation in the municipal and industrial segments. Other important fields of business are animal feed and biomass pelleting, as well as automation, where ANDRITZ offers a wide range of innovative products and services in the IIoT (Industrial Internet of Things) sector under the brand name of Metris. In addition, the international technology Group is active in power generation (steam boiler plants, biomass power plants, recovery boilers, and gasification plants) and environmental technology (flue gas cleaning plants) and offers equipment for the production of nonwovens, dissolving pulp, and panelboard, as well as recycling plants.

A passion for innovative technology, absolute customer focus, reliability, and integrity are the central values to which ANDRITZ commits. The listed Group is headquartered in Graz, Austria. With over 160 years of experience, 29,000 employees, and more than 280 locations in over 40 countries worldwide, ANDRITZ is a reliable and competent partner and helps its customers to achieve their corporate and sustainability goals.

ANDRITZ PULP & PAPER

ANDRITZ Pulp & Paper is a leading global supplier of complete plants, systems, equipment, and comprehensive services for the production and processing of all types of pulp, paper, board, and tissue. The technologies cover processing of logs, annual fibers, and waste paper; production of chemical pulp, mechanical pulp, and recycled fibers; recovery and reuse of chemicals; preparation of paper machine furnish; production of paper, board, and tissue; sizing, calendering and coating of paper; as well as treatment of reject materials and sludge. The service offering includes system and machine modernization, rebuilds, spare and wear parts, on-site and workshop services, optimization of process performance, maintenance and automation solutions, as well as machine relocation and second-hand equipment. Biomass, steam and recovery boilers for power production, gasification and flue gas cleaning plants, systems and plants for the production of nonwovens, dissolving pulp, and panelboard (MDF), as well as recycling and shredding solutions for various waste materials also form a part of this business area.
