

For high intensity mixing in demanding applications such as slurries for ethanol production, dryer conditioning in corn wet milling, and industrial processes.

STANDARD FEATURES

- Adjustable speed, retention time, mixing intensity
- Even discharge of product

- Compact design can be installed in areas with limited overhead space
- Dual agitator shafts with adjustable paddles on a helix
- Outbound pillow block bearings helps prevent contamination

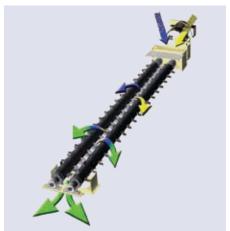

OPTIONS

- Variable speed drive
- Abrasion resistant paddles

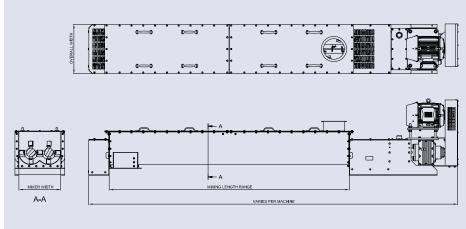

- Speed switch
- Gas purged lantem rings
- Heating/cooling jacket
- Special finishes
- Liquid addition parts
