

PULP & PAPER

Papillon REFINER

GENTLE AND STABLE REFINING

The ANDRITZ Papillon refiner is an innovative refiner with a cylindrical refining zone. Its special geometry combines gentle and homogenous fiber treatment from refiner inlet to outlet with fast maintenance because the refiner segments are

easily accessible. The Papillon refiner concept offers significant improvements in energy consumption thanks to the compact rotor design compared to competitive refiners in similar applications. Efficient treatment of the fibers throughout the

entire refining area is a precondition for superior paper properties. The Papillon refiner has proven its unique design, particularly in virgin and annual fiber applications.

ANDRITZ

ENGINEERED SUCCESS

Gentle and energy-efficient fiber treatment in a compact design

BENEFITS:

- Optimum development of the fiber potential by using a cylindrical machine concept
- Reduction of operating costs in connection with energy consumption
- Improved paper appearance and runability of the paper machine

The ANDRITZ Papillon refiner is available in four sizes, featuring single or center feed and installed power up to 1,600 kW.
