

PRESS RELEASE

ANDRITZ launches MasterDry™ dryer fabric portfolio

- World-class performance woven and spiral fabric technology
- For all applications including high-temperature and contamination-prone positions with improved sheet quality and long life
- Best-in-class seam technology for fast installation
- Modernized and expanded global manufacturing capabilities

GRAZ/ YOUNGSVILLE, OCTOBER 7, 2019. International technology Group ANDRITZ presents its new “MasterDry™” dryer fabric portfolio based on premium-performance dryer fabric technology.

MasterDry includes best-in-class woven and spiral fabrics specifically designed for the broadest range of applications, from the fastest low-caliper, single-tier positions, for high-temperature positions, and for those positions requiring extreme contamination resistance. It includes specially engineered woven or spiral dryer fabrics to cover an entire paper machine producing paperboard/packaging and graphical papers or also pulp machines, thus providing customers with a very comprehensive suite of high-performance dryer fabric options.

“We will continue to focus on R&D to launch new innovative products and to invest in our plants to become the premier global supplier of the highest quality dryer fabric technology with shortest delivery times,” says Bill Butterfield, Executive Vice President and Chief Technology Officer at ANDRITZ Fabrics and Rolls.

With the new MasterDry portfolio of dryer fabrics, ANDRITZ once again confirms its position as one of the global market leaders for the supply of innovative fabrics, press felts, and roll technology solutions.

ANDRITZ GROUP

ANDRITZ is an international technology group providing plants, systems, equipment, and services for various industries. The company is one of the technology and global market leaders in the hydropower business, the pulp and paper industry, the metal working and steel industries, and in solid/liquid separation in the municipal and industrial segments. Other important fields of business are animal feed and biomass pelleting, as well as automation, where ANDRITZ offers a wide range of innovative products and services in the IIoT (Industrial Internet of Things) sector under the brand name of Metris. In addition, the company is active in power generation (steam boiler plants, biomass power plants, recovery boilers, and gasification plants) and environmental technology (flue gas and exhaust gas cleaning plants) and offers equipment for the production of nonwovens, dissolving pulp, and panelboard, as well as recycling plants.

ANDRITZ stands for passion, partnership, perspectives and versatility – core values to which the company is committed. The listed Group is headquartered in Graz, Austria. With almost 170 years of experience, 29,600 employees, and more than 280 locations in over 40 countries worldwide, ANDRITZ is a reliable and competent partner and helps its customers to achieve their corporate and sustainability goals.

ANDRITZ PULP & PAPER

ANDRITZ Pulp & Paper is a leading global supplier of complete plants, systems, equipment, and comprehensive services for the production and processing of all types of pulp, paper, board, and tissue. The technologies cover processing of logs, annual fibers, and waste paper; production of chemical pulp, mechanical pulp, and recycled fibers; recovery and reuse of chemicals; preparation of paper machine furnish; production of paper, board, and tissue; sizing, calendering and coating of paper; as well as treatment of reject materials and sludge. The service offering includes system and machine modernization, rebuilds, spare and wear parts, on-site and workshop services, optimization of process performance, maintenance and automation solutions, as well as machine relocation and second-hand equipment. Biomass, steam and recovery boilers for power production, gasification and flue gas cleaning plants, systems and plants for the production of nonwovens and absorbent hygiene products, dissolving pulp, and panelboard (MDF), as well as recycling and shredding solutions for various waste materials also form a part of this business area.
