

PRESS RELEASE

ANDRITZ and Mondi discuss major technology trends for the pulp and paper industries

GRAZ, NOVEMBER 29, 2019. At the beginning of this week, international technology Group ANDRITZ welcomed a delegation of more than 25 experts from different mills and locations of the Mondi Group at its headquarters in Graz to discuss major technology trends and the latest innovations in the pulp and paper industries.

The various presentations given by representatives of ANDRITZ focused on mechanical pulping, stock preparation and recycled fiber systems, paper and board machines, rejects and recycling technologies, fabrics and rolls, and power boilers. ANDRITZ Automation experts demonstrated the capabilities of the Metris UX Digital Solutions by remotely monitoring the ANDRITZ Metris X control system installed at the Mondi paper production mill in Štětí, Czech Republic.

"It was a very interesting conference with a good mix of well-known proven technologies and latest innovations like the Vertical Screw Thickener, large steel cylinders, smart fabrics, and solutions for digitalization. We collected some food for thought, and our teams are looking forward to more detailed technical discussions with ANDRITZ", commented Lars Mallasch, Mondi Director Technology & Capex Corrugated Packaging.

The two-day event also included a guided workshop tour and a visit to the stock preparation pilot plant to get an impression of ANDRITZ's manufacturing capabilities and R&D activities. *"It was a great honor for ANDRITZ to welcome so many representatives of the Mondi Group here in Graz. This is a further proof of the excellent long-term partnership between the two companies",* said Wolfgang Lashofer, Manager of the Paper, Fiber and Recycling division. "

ANDRITZ GROUP

ANDRITZ is an international technology group providing plants, systems, equipment, and services for various industries. The company is one of the technology and global market leaders in the hydropower business, the pulp and paper industry, the metal working and steel industries, and in solid/liquid separation in the municipal and industrial segments. Other important fields of business are animal feed and biomass pelleting, as well as automation, where ANDRITZ offers a wide range of innovative products and services in the IIoT (Industrial Internet of Things) sector under the brand name of Metris. In addition, the company is active in power generation (steam boiler plants, biomass power plants, recovery boilers, and gasification plants) and environmental technology (flue gas and exhaust gas cleaning plants) and offers equipment for the production of nonwovens, dissolving pulp, and panelboard, as well as recycling plants.

ANDRITZ stands for passion, partnership, perspectives and versatility – core values to which the company is committed. The listed Group is headquartered in Graz, Austria. With almost 170 years of experience, 29,700 employees, and more than 280 locations in over 40 countries worldwide, ANDRITZ is a reliable and competent partner and helps its customers to achieve their corporate and sustainability goals.

ANDRITZ PULP & PAPER

ANDRITZ Pulp & Paper is a leading global supplier of complete plants, systems, equipment, and comprehensive services for the production and processing of all types of pulp, paper, board, and tissue. The technologies cover processing of logs, annual fibers, and waste paper; production of chemical pulp, mechanical pulp, and recycled fibers; recovery and reuse of chemicals; preparation of paper machine furnish; production of paper, board, and tissue; sizing, calendering and coating of paper; as well as treatment of reject materials and sludge. The service offering includes system and machine modernization, rebuilds, spare and wear parts, on-site and workshop services, optimization of process performance, maintenance and automation solutions, as well as machine relocation and second-hand equipment. Biomass, steam and recovery boilers for power production, gasification and flue gas cleaning plants, systems and plants for the production of nonwovens and absorbent hygiene products, dissolving pulp, and panelboard (MDF), as well as recycling and shredding solutions for various waste materials also form a part of this business area.
