

PRESS RELEASE

ANDRITZ to supply a Universal Shredder FRP to the Setra Group, Sweden

GRAZ, FEBRUARY 24, 2020. International technology Group ANDRITZ has received an order from the Setra Group to supply a Universal Shredder FRP for their cross-laminated timber (CLT) production line in Långshyttan, Sweden.

The new FRP shredder, type 2000P, will be used to shred the rejects from the production process and is capable of processing up to four tons of wood rejects per hour. A special cutting technology is required to handle this very solid and hard laminated wood. The Universal Shredder FRP includes a so-called CoverCross system with overlapping knives, making the machine the perfect choice to master this challenge, and guarantees uniform breakdown of the input material. In addition, the rotor rotates continuously to ensure high throughput and maximum efficiency. The scope of delivery also includes the input hopper.

Setra, one of Sweden's largest wood product companies with about 800 employees, operates eight sawmills and three processing facilities. The company processes raw materials from responsibly managed forests and offers climate-friendly products and solutions for the building and furniture/interiors industries in the global market.

ANDRITZ GROUP

ANDRITZ is an international technology group providing plants, systems, equipment, and services for various industries. The company is one of the technology and global market leaders in the hydropower business, the pulp and paper industry, the metal working and steel industries, and in solid/liquid separation in the municipal and industrial segments. Other important fields of business are animal feed and biomass pelleting, as well as automation, where ANDRITZ offers a wide range of innovative products and services in the IIoT (Industrial Internet of Things) sector under the brand name of Metris. In addition, the company is active in power generation (steam boiler plants, biomass power plants, recovery boilers, and gasification plants) and environmental technology (flue gas and exhaust gas cleaning plants) and offers equipment for the production of nonwovens, dissolving pulp, and panelboard, as well as recycling plants.

ANDRITZ stands for passion, partnership, perspectives and versatility – core values to which the company is committed. The listed Group is headquartered in Graz, Austria. With almost 170 years of experience, approximately 29,700 employees, and more than 280 locations in over 40 countries worldwide, ANDRITZ is a reliable and competent partner and helps its customers to achieve their corporate and sustainability goals.

ANDRITZ RECYCLING

The ANDRITZ plant range offers recycling solutions for a wide variety of different applications: Electronic and electrical waste, refrigerators, cables and flexible wires, metals, end of life vehicle parts like oil filters, motor blocks and tires, household, industrial, organic and wood waste as well as rejects from the pulp and paper industry. The service offering includes system and machine modernization, rebuilds, spare and wear parts, on-site and workshop services, optimization of process performance, maintenance and automation solutions, as well as machine relocation and second-hand equipment.
