

PRESS RELEASE

ANDRITZ to supply OCC line including detailed engineering to UPPC, Philippines

GRAZ, MARCH 6, 2020. International technology Group ANDRITZ will install an OCC line with a design capacity of 870 admt/d at United Pulp and Paper Co., Inc. (UPPC), Calumpit mill, Bulacan, Philippines. Start-up is scheduled for the fourth quarter of 2020.

The new line will process OCC (Old Corrugated Cardboard) as raw material to produce corrugated medium. The pulping system comprises an ANDRITZ FibreSolve FSR pulper with FibreGuard detrashing system. The innovative layout of the detrashing system features an elevated FibreGuard detrasher above the drum screen, type ANDRITZ FibreWashDrum, to ensure easy and efficient reject removal. Fractionators and fine screens will be equipped with newly developed *PrimeRotors* to remove stickies efficiently and at lower energy consumption compared to conventional rotor types.

With this turnkey project, UPPC's parent company, Siam Kraft Industry Co., Ltd., which is part of the well-known SCG Group, once again affirms the long-term cooperation between Siam Kraft Industry and ANDRITZ (China) Ltd., which has already supplied two complete new lines and rebuilt several OCC systems for Siam Kraft Industry. ANDRITZ (China) Ltd. will also supply the complete detailed engineering as well as reject equipment.

ANDRITZ's innovative technologies and the excellent performance of the OCC lines previously supplied were the decisive criteria for the repeat order.

SCG Packaging is a leading manufacturer of high-quality packaging paper in Thailand, the largest manufacturer in Southeast Asia and operates mills in Thailand, Vietnam, Indonesia and the Philippines.

ANDRITZ GROUP

International technology group ANDRITZ offers a broad portfolio of innovative plants, equipment, systems and services for the pulp and paper industry, the hydropower sector, the metals processing and forming industry, pumps, solid/liquid separation in the municipal and industrial sectors, as well as animal feed and biomass pelleting. The global product and service portfolio is rounded off with plants for power generation, recycling, the production of nonwovens and panelboard, as well as automation and digital solutions offered under the brand name of Metris. The publicly listed group today has around 29,500 employees and more than 280 locations in over 40 countries.

ANDRITZ PULP & PAPER

ANDRITZ Pulp & Paper provides equipment, systems, complete plants and services for the production of all types of pulp, paper, board and tissue. The technologies and services focus on maximum utilization of raw materials, increased production efficiency and sustainability as well as lower overall operating costs. Boilers for power production, flue gas cleaning plants, plants for the production of nonwovens and panelboard (MDF), as well as recycling and shredding solutions for various waste materials also form a part of this business area.
