

## ANDRITZ Cable Cutter CC1200

Second-hand machine

### For cables of all sizes

The CableCutter CC operates according to the principle of guillotine shears. The cutting geometry has been geared to the special requirements of copper, aluminum, lead and insulation materials. This machine provides consistent, high cutting quality with low costs for wear and tear.

High-strength special steel grades are used for the rotor blades. The granulating screen is easy to replace, the input shaft has a large-area input opening, the entire machine is made of heavy-duty welded steel, and the subframe consists of double T-beams – all of which ensure high resilience and low-vibration operation.

### Machine data

Machine type:	CC1200
Year built:	2010
Condition:	Refurbished 2012
Tools:	Rotating knives (27 pcs. – rotor, 10 pcs. – stator)
Cutting unit:	1,200 x 600 mm
Drive power:	110 kW, 50 Hz, 400 V
Rotating speed:	1,480 r.p.m.
Operating hours:	5
Color:	RAL 6018/5010
Machine ID:	M-936

### Standard equipment

- Approx. 5 m cabling
- Central, automatic lubrication system
- Control cabinet incl. electrical controls
- Documentation in German
- Infeed chute with special hopper
- Hydraulic unit (6 kW)
- Substructure with a height of 1,470 mm
- Maintenance stairway
- Discharge conveyor

Subject to prior sale!  
Sold as seen – without guarantee.
