

PRESS RELEASE

ANDRITZ to supply stock preparation equipment for sack paper production to Segezha Pulp and Paper Mill, Russia

GRAZ, OCTOBER 16, 2020. International technology Group ANDRITZ has received an order from Segezha Pulp and Paper Mill, a member of the Segezha Group (part of PJSC Sistema), to supply stock preparation equipment for its mill in Segezha, Republic of Karelia, Russia. Start-up is scheduled for the beginning of 2021.

The new system will feature a capacity of 350 bdmt/d and process bleached market pulp bales to produce a new final product – white high-porosity sack paper. The scope of supply comprises the bale feeding line with a manual dewiring station, an ANDRITZ FibreSolve FSV pulper for efficient slushing, a ModuScreen CP protection screen, as well as the complete control and electrification system.

With start-up of the new line, the Segezha Group will be the first producer of high-porosity sack paper in Russia. The entire production volume will be supplied to the company's own converting facilities.
