

PRESS RELEASE

ANDRITZ to supply two tissue machines to Guangxi Sun Paper in China

GRAZ, OCTOBER 30, 2020. International technology Group ANDRITZ has received an order from Guangxi Sun Paper to supply two tissue machines for its new mill in Beihai City, Guangxi Province, China. Start-up is planned for 2021.

The ANDRITZ tissue machines are of the type *PrimeLine*™ W 2000, with a design speed of 2,000 m/min and a working width of 5.65 m. They are equipped with a large suction press roll, an 18 ft. *PrimeDry* Steel Yankee with head insulation, and a re-evaporation system, thus enabling energy savings. The scope of supply also includes FibreSolve FSV pulpers, the paper machine approach flow systems, broke handling and fiber recovery, and automation systems (QCS, DCS).

In July 2019, Sun Paper established a wholly owned subsidiary – Guangxi Sun Paper – to build an integrated pulp and paper mill in Beihai. For this mill, ANDRITZ was awarded the supply of pulp dewatering and white liquor plant technologies, key process equipment, and a chemi-thermomechanical pulping system in June 2020. The new greenfield mill in Beihai will eventually have a total pulp and paper capacity of 3.5 million tons annually and will be constructed in two phases over approximately five years.

The present order underlines the strong partnership that Sun Paper and ANDRITZ have in tissue. For the production site in Shandong province, ANDRITZ has already delivered two tissue production lines with tissue machines, stock preparation and automation that have been in operation since 2014 and 2015, respectively. This order once again confirms ANDRITZ's strong market position as one of the leading suppliers of machines and systems to the Chinese tissue industry and ANDRITZ's expertise specifically in wide tissue machines and resource-saving components like steel Yankees.

– End –

ENGINEERED SUCCESS

ANDRITZ will supply two *PrimeLine*TM tissue machines to Guangxi Sun Paper.

ANDRITZ GROUP

International technology group ANDRITZ offers a broad portfolio of innovative plants, equipment, systems and services for the pulp and paper industry, the hydropower sector, the metals processing and forming industry, pumps, solid/liquid separation in the municipal and industrial sectors, as well as animal feed and biomass pelleting. The global product and service portfolio is rounded off with plants for power generation, recycling, the production of nonwovens and panelboard, as well as automation and digital solutions offered under the brand name of Metris. The publicly listed group today has around 27,800 employees and more than 280 locations in over 40 countries.

ANDRITZ PULP & PAPER

ANDRITZ Pulp & Paper provides equipment, systems, complete plants and services for the production of all types of pulp, paper, board and tissue. The technologies and services focus on maximum utilization of raw materials, increased production efficiency and sustainability as well as lower overall operating costs. Boilers for power production, flue gas cleaning plants, plants for the production of nonwovens and panelboard (MDF), as well as recycling and shredding solutions for various waste materials also form a part of this business area.
