

ULTRAFLEXX EXTENSIBLE BLANKET

BY ANDRITZ FABRICS AND ROLLS

Ultraflexx premium blanket technology is engineered to deliver optimized machine performance with the highest sheet quality for extensible paper manufacturing units. Ultraflexx blankets provide extensible units with a more flexible blanket which delivers easier start-ups and superior crack resistance. Ultraflexx also provides improved paper properties, improved surface grindability, reduced energy consumption, and extended life potential.

Ultraflexx is available in 2 versions to address your specific machine objectives.

FEATURES

- Optimized material property development
- Softer, more flexible blanket material
- Improved crack resistance
- Excellent sheet release
- Extended blanket life
