

## PRESS RELEASE

# ANDRITZ to supply two complete OCC lines to Nine Dragons, China

*GRAZ, MAY 31, 2021.* International technology Group ANDRITZ has received an order from Nine Dragons Paper Industries to supply two complete OCC lines with a capacity of 2,000 bdmt/d each to their mills in China. Start-up is scheduled for the second and fourth quarter of 2022, respectively.

The lines feature the following technological highlights:

- FibreFlow Drum pulping systems, ensuring premium accept quality thanks to gentle slushing and efficient removal of coarse contaminants with minimum fiber loss
- *PrimeScreen F* fine screens and fractionators with newly developed *PrimeFoils* for increased efficiency and lower power consumption
- *PrimeFilter D* disc filters – the latest ANDRITZ innovation in thickening and fiber recovery – enabling the system to handle higher feed consistencies and higher-freeness pulp, even in the most demanding applications, and in parallel offering significant improvements in terms of energy consumption and maintenance
- Ultra-high dispersing, allowing dispersion at a consistency of up to 40% to achieve substantial savings in steam consumption and superior fiber strength development.

The stock preparation systems will use 100% LOCC (local old corrugated containers) as raw material to produce high-quality packaging paper.

Nine Dragons Paper is part of the Nine Dragons Paper Group, an important global player in the pulp and paper industry with mills in China, Vietnam, Malaysia, and the United States. The group primarily produces linerboard, high-performance corrugating medium and coated duplex board as well as printing and writing paper.

## **ANDRITZ GROUP**

International technology group ANDRITZ offers a broad portfolio of innovative plants, equipment, systems and services for the pulp and paper industry, the hydropower sector, the metals processing and forming industry, pumps, solid/liquid separation in the municipal and industrial sectors, as well as animal feed and biomass pelleting. Plants for power generation, flue gas cleaning, recycling, and the production of nonwovens and panelboard complete the global product and service offering. Innovative products and services in the industrial digitalization sector are offered under the brand name Metris and help customers to make their plants more user-friendly, efficient and profitable. The publicly listed group has around 26,950 employees and more than 280 locations in over 40 countries.

## **ANDRITZ PULP & PAPER**

ANDRITZ Pulp & Paper provides equipment, systems, complete plants and services for the production of all types of pulp, paper, board and tissue. The technologies and services focus on maximum utilization of raw materials, increased production efficiency and sustainability as well as lower overall operating costs. Boilers for power generation, flue gas cleaning systems, plants for the production of nonwovens and panelboard (MDF), as well as recycling and shredding solutions for various waste materials also form a part of this business area. State-of-the-art IIoT technologies as part of Metris digitalization solutions complete the comprehensive product offering.
