

PRESS RELEASE

ANDRITZ successfully starts up a P-RC APMP fiberline at Dezhou Taiding, China

GRAZ, JUNE 18, 2021. International technology Group ANDRITZ has successfully started up the new chemi-thermomechanical pulping systems at Dezhou Taiding New Material Science and Technology, Shandong, China.

The new P-RC APMP (Pre-Conditioning Refiner Chemical Alkaline Peroxide Mechanical Pulp) fiberline features a capacity of 400 t/d and processes poplar as raw material. The fiber produced is being used on the company's own paper machines for P&W (printing and writing paper) and board grades.

ANDRITZ installed the key components for the entire mechanical fiberline, ranging from chip washing to the final pulp washing and dewatering press as well as provided engineering, training as well as supervision of the mechanical installation, commissioning and start-up.

Mr. Luan Xinping, Vice President, Dezhou Taiding says: *"The new P-RC APMP fiberline is already delivering the first highly promising operational results as to fiber quality and energy savings, especially due to superior chip pretreatment in the MSD Impressafiner and excellent refining performance achieved by the S2070 disc refiner. Many thanks to the ANDRITZ team for the professional support during the start-up phase."*

Dezhou Taiding New Material Science and Technology Co., Ltd. was founded in 1998 and today is a joint-stock company serving the pulp production, papermaking and thermo-electricity business. It is one of the important players in the paper industry in the Shandong region, China.

ANDRITZ GROUP

International technology group ANDRITZ offers a broad portfolio of innovative plants, equipment, systems and services for the pulp and paper industry, the hydropower sector, the metals processing and forming industry, pumps, solid/liquid separation in the municipal and industrial sectors, as well as animal feed and biomass pelleting. Plants for power generation, flue gas cleaning, recycling, and the production of nonwovens and panelboard complete the global product and service offering. Innovative products and services in the industrial digitalization sector are offered under the brand name Metris and help customers to make their plants more user-friendly, efficient and profitable. The publicly listed group has around 26,950 employees and more than 280 locations in over 40 countries.

ANDRITZ PULP & PAPER

ANDRITZ Pulp & Paper provides equipment, systems, complete plants and services for the production of all types of pulp, paper, board and tissue. The technologies and services focus on maximum utilization of raw materials, increased production efficiency and sustainability as well as lower overall operating costs. Boilers for power generation, flue gas cleaning systems, plants for the production of nonwovens and panelboard (MDF), as well as recycling and shredding solutions for various waste materials also form a part of this business area. State-of-the-art IIoT technologies as part of Metris digitalization solutions complete the comprehensive product offering.
