

## PRESS RELEASE

# ANDRITZ to supply another flue gas desulphurization plant to Tata Projects Limited for the thermal power plant in Jojobera India

*GRAZ, JULY 23, 2021.* International technology Group ANDRITZ has received another order from Tata Projects Limited, India, to supply the process engineering for a complete flue gas desulphurization (FGD) plant, comprising basic engineering and the detailed engineering for the absorber internals and equipment as well as other core components for the Jojobera power plant (output: 4 x 120 MW), near Jamshedpur, East Singhbhum District, Jharkhand State, India. Start-up is scheduled for the first half of 2023.

For desulphurization purposes, the exhaust gas is washed in counter-current flow with a limestone suspension, reducing the content of SO<sub>2</sub> and other acidic components to concentrations in line with the current environmental requirements. With further oxidation, process gypsum can be produced that is either landfilled or sold to the construction industry.

ANDRITZ has comprehensive experience with FGD technologies and many successful references around the world. This project is another important step towards establishing ANDRITZ's flue gas treatment technology on the Indian market.

#### **ANDRITZ GROUP**

International technology group ANDRITZ offers a broad portfolio of innovative plants, equipment, systems and services for the pulp and paper industry, the hydropower sector, the metals processing and forming industry, pumps, solid/liquid separation in the municipal and industrial sectors, as well as animal feed and biomass pelleting. Plants for power generation, flue gas cleaning, recycling, and the production of nonwovens and panelboard complete the global product and service offering. Innovative products and services in the industrial digitalization sector are offered under the brand name Metris and help customers to make their plants more user-friendly, efficient and profitable. The publicly listed group has around 26,950 employees and more than 280 locations in over 40 countries.

#### **ANDRITZ PULP & PAPER**

ANDRITZ Pulp & Paper provides equipment, systems, complete plants and services for the production of all types of pulp, paper, board and tissue. The technologies and services focus on maximum utilization of raw materials, increased production efficiency and sustainability as well as lower overall operating costs. Boilers for power generation, flue gas cleaning systems, plants for the production of nonwovens and panelboard (MDF), as well as recycling and shredding solutions for various waste materials also form a part of this business area. State-of-the-art IIoT technologies as part of Metris digitalization solutions complete the comprehensive product offering.
