

PRESS RELEASE

ANDRITZ to supply complete electro-mechanical equipment for the new Lower Kopili hydropower plant, India

GRAZ/VIENNA, NOVEMBER 25, 2021. International technology group ANDRITZ has received an order from the Assam state government-owned utility Assam Power Generation Corporation Ltd. (APGCL) to supply the complete electro-mechanical equipment for the Lower Kopili hydropower plant located on the Kopili river in central Assam, India. Start of commercial operation is scheduled for end of 2024.

The ANDRITZ scope of supply consists of plant design and engineering, manufacture, supply, erection, testing, and commissioning of the complete electro-mechanical equipment including all five turbine-generator units for the Lower Kopili hydroelectric project. This will be the first contract that ANDRITZ has received from APGCL in the state of Assam.

Once completed, the hydropower plant will have a total installed capacity of about 120 MW based on two main units and three environmental flow units and provide 456 GWh of electricity per year. The project will provide strong support in covering the growing demand for electricity in the Indian state of Assam.

ANDRITZ GROUP

International technology group ANDRITZ offers a broad portfolio of innovative plants, equipment, systems and services for the pulp and paper industry, the hydropower sector, the metals processing and forming industry, pumps, solid/liquid separation in the municipal and industrial sectors, as well as animal feed and biomass pelleting. Plants for power generation, flue gas cleaning, recycling, and the production of nonwovens and panelboard complete the global product and service offering. Innovative products and services in the industrial digitalization sector are offered under the brand name Metris and help customers to make their plants more user-friendly, efficient and profitable. The publicly listed group has around 26,800 employees and more than 280 locations in over 40 countries.

ANDRITZ HYDRO

ANDRITZ Hydro is one of the globally leading suppliers of electromechanical equipment and services for hydropower plants. With over 180 years of experience and an installed fleet of more than 470 GW output, the business area provides complete solutions for hydropower plants of all sizes as well as services for plant diagnosis, refurbishment, modernization, and upgrade of existing hydropower assets. Pumps for irrigation, water supply and flood control are also part of this business area's portfolio.
