

PRESS RELEASE

ANDRITZ to supply the 12th high-efficiency PowerFluid circulating fluidized bed boiler to Japan

GRAZ, JANUARY 5, 2022. International technology group ANDRITZ has received another order from Toyo Engineering Corporation in Japan to supply a 50-MWe PowerFluid circulating fluidized bed (CFB) boiler on EPS basis. The boiler will be part of the biomass power plant in Tahara-shi, Aichi Prefecture, in Japan. Start-up is planned for 2025.

The ANDRITZ PowerFluid boiler will be integrated into a biomass-fired power generation facility that will be fueled by wood pellets. With its high efficiency and state-of-the-art technology, it is the perfect solution to meet greenhouse gas reduction targets and contribute towards carbon neutrality in Japan. The biomass power plant will be capable of supplying power for roughly 110,000 households in Japan.

This order once again confirms ANDRITZ's strong partnership with Toyo Engineering Cooperation. ANDRITZ is proud to be part of this remarkable project and make another important contribution towards the Japanese power industry's move from fossil fuel to renewable energy resources.

ANDRITZ GROUP

International technology group ANDRITZ offers a broad portfolio of innovative plants, equipment, systems and services for the pulp and paper industry, the hydropower sector, the metals processing and forming industry, pumps, solid/liquid separation in the municipal and industrial sectors, as well as animal feed and biomass pelleting. Plants for power generation, flue gas cleaning, recycling, and the production of nonwovens and panelboard complete the global product and service offering. Innovative products and services in the industrial digitalization sector are offered under the brand name Metris and help customers to make their plants more user-friendly, efficient and profitable. The publicly listed group has around 26,800 employees and more than 280 locations in over 40 countries.

ANDRITZ PULP & PAPER

ANDRITZ Pulp & Paper provides equipment, systems, complete plants and services for the production of all types of pulp, paper, board and tissue. The technologies and services focus on maximum utilization of raw materials, increased production efficiency and sustainability as well as lower overall operating costs. Boilers for power generation, flue gas cleaning systems, plants for the production of nonwovens and panelboard (MDF), as well as recycling and shredding solutions for various waste materials also form a part of this business area. State-of-the-art IIoT technologies as part of Metris digitalization solutions complete the comprehensive product offering.
