

PRESS RELEASE

ANDRITZ to supply two PMA systems and LC refining to Dongfang Smart Energy, China

GRAZ, JUNE 29, 2022. International technology group ANDRITZ has received an order from Dongfang Smart Energy Co., Ltd. of Shaanxi Power Generation Group to supply two paper machine approach flow systems and LC (low consistency) refiners to its mill in Wugong County, Xianyang City, Shaanxi Province, China. Start-up is scheduled for the second quarter of 2023.

The highly efficient PMA systems will have an aggregate design capacity of 1,850 t/d and will be part of lines PM1 and PM2 producing kraft board and testliner. Installation and supervision of start-up are also part of the scope of supply.

Zhao Shengli, General Manager, Dongfang Smart Energy says: *“ANDRITZ’s impressive reference projects convinced us to trust in its well proven technology. We are looking forward to seeing the benefits we are expecting – excellent performance and significant energy savings.”*

Dongfang Smart Energy Co., Ltd., of Shaanxi Power Generation Group, was established in 2020 and is active in various business segments, such as pulp and paper production, thermal power production and supply, sewage treatment and recycling, and the recovery of renewable resources.

ANDRITZ GROUP

International technology group ANDRITZ offers a broad portfolio of innovative plants, equipment, systems, services and digital solutions for a wide range of industries and end markets. ANDRITZ is a global market leader in all four of its business areas – Pulp & Paper, Metals, Hydro, and Separation. Technological leadership, global presence and sustainability are the cornerstones of the group's strategy, which is focused on long-term profitable growth. The publicly listed group has around 27,100 employees and over 280 locations in more than 40 countries.

ANDRITZ PULP & PAPER

ANDRITZ Pulp & Paper provides sustainable technology, automation, and service solutions for the production of all types of pulp, paper, board and tissue. The technologies and services focus on maximum utilization of raw materials, increased production efficiency, lower overall operating costs as well as innovative decarbonization strategies and autonomous plant operation. Boilers for power generation, flue gas cleaning systems, various nonwoven technologies, panelboard (MDF) production systems, as well as recycling and shredding solutions for numerous waste materials also form a part of this business area. State-of-the-art IIoT technologies as part of Metris digitalization solutions complete the comprehensive product offering.
