

NONWOVEN CARD INTERMEDIATE SECTION UPGRADE

REPLACE HOURS OF MAINTENANCE WITH
HOURS OF PRODUCTION

LONG-TERM EXPERTISE

ANDRITZ solutions are based on our proven experience through continuous innovation to fulfill your needs in terms of quality and productivity. Whatever carding machine configuration you have, we can provide clever intermediate section upgrade solutions adapted to your needs.

EFFICIENT AND ADAPTABLE

We offer a variety of options for your card's intermediate section. These are designed to avoid fiber wrapping and volatile fiber accumulations in your machine and give you full product control.

FAST AND EFFICIENT START-UP

Our card intermediate section upgrades are pre-assembled before shipping. Thus, we ensure maximum quality control, extensive traceability for each of our components, and minimized downtime for installation purposes.

ANDRITZ

ENGINEERED SUCCESS

Reduced maintenance, increased production quality

SOLUTIONS TAILORED TO YOUR NEEDS

Our card intermediate section mechanical upgrade focuses on replacing certain components to improve your carding process. Thus, we will replace parts of the core structure to reduce fiber wrapping and volatile fiber accumulations. This will be in addition of the vacuum system to simplify your maintenance procedures.

BENEFITS

- Continuous development of our solutions
- Simplify your autonomous maintenance procedure
- Longer intervals between machine cleaning
- Less cleaning time, more productivity
- Long-term support and traceability for each of our parts
- Reduce fiber contamination under the card

HOW TO PROCEED

Send us a request with the serial number of your machine as well as some photos and information on your production operations. Your ANDRITZ Service Account Manager will study your case with the ANDRITZ team and provide the best solution for your machine and production.
