

NONWOVEN CFX & TMS-TCF UPGRADE

A HIGH-PERFORMANCE SOLUTION FOR
EVERY SITUATION

LONG-TERM EXPERTISE

ANDRITZ retrofit and upgrade solutions are based on more than 10 years of continuous innovation and development to the benefit of your production. Whether you have a CFX or an early-generation TMS-TCF, we can provide clever retrofit solutions tailored to your needs.

SUSTAINABILITY AND MODERNITY

We can replace your CFX or retrofit your TMS-TCF in order to upgrade your production line with newer, more modern machines and components. This modernization process is designed to prolong the lifespan of your machine and improve production quality.

FAST AND EFFICIENT START-UP

Our CFX and TMS-TCF upgrades are pre-assembled and fully tested before shipping. Thus, we ensure maximum quality control, extensive traceability for each of our components, and minimized downtime for installation purposes.

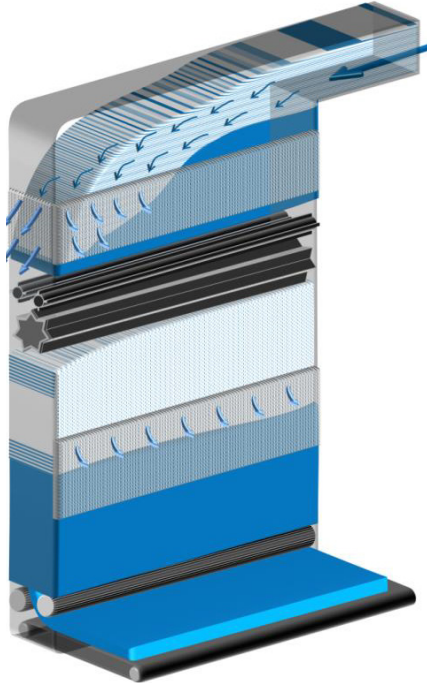

ANDRITZ

ENGINEERED SUCCESS

Tailored solutions to the benefit of your production

CFX RETROFIT

If you own a CFX, we can offer to replace it with a brand new TMS-TCF. Our equipment allows you better control over your product quality and homogeneity thanks to its air-controlled feeding and profiling chute. The TMS-TCF features a complete control cabinet equipped with our new Microbox solution. If you want to retrofit your card with a Microbox as well, we can integrate the TMS-TCF hardware and software components inside your card's control cabinets, enabling them to share the same screen and saving space.

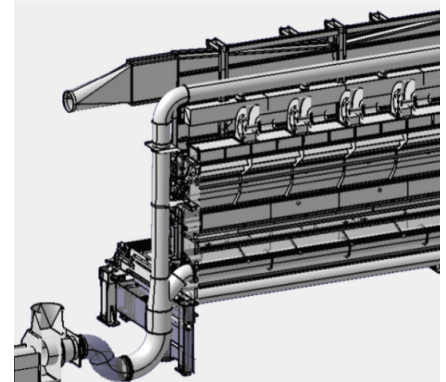

TMS-TCF RETROFIT

If you already own a TMS-TCF, we can offer a complete retrofit solution with useful options. First, we will replace IPC racks with our Microbox solution as well as the drives and screen. And if you retrofit your card at the same time, we can offer to integrate the TMS-TCF electrical hardware in the card's new control cabinet. Moreover, you will have the option of equipping your machine with a dedusting system on the TMS, TCF or both machines. This will allow your machine to remain free of dust and fiber residues and extend the maintenance intervals.

BENEFITS

- Continuous development of our retrofit components
- Troubleshooting management via remote access
- Root cause analysis using our Microbox solution
- User-friendly screen interface
- Shorter maintenance times thanks to our dedusting system option
- Profiling chute option designed to further adjust battforming
- More homogeneous battforming
