

# NONWOVEN A50 NEEDLELOOM UPGRADE AND REFURBISHMENT

IMPROVE THE EFFICIENCY OF YOUR NEEDLELOOM

## **MAKE YOUR INSTALLED BASE SUSTAINABLE**

A50 needlelooms are based on a proven and efficient machine design that we have constantly improved throughout its development. Today, first-generation A50 needlelooms can be fitted with modern components thanks to our upgrade solution.

## **PRODUCTIVITY AND PEACE OF MIND**

Our A50 upgrade focuses on improving the reliability and durability of your machine in order to avoid the need for any tedious troubleshooting. In addition, we offer several options designed to make your life easier and improve your equipment's productivity.

## **FAST AND EFFICIENT START-UP**

Our A50 needleloom upgrade components are pre-assembled before shipping. Thus, we ensure maximum quality control, extensive traceability for each of our components, and minimized downtime for installation purposes.

**ENGINEERED SUCCESS**

# Modernization in the interests of your needling process

## WHAT WILL BE REPLACED?

In order to keep your A50 needle-  
looms up to date, we support your  
maintenance work by conducting  
an audit and check crucial com-  
ponents such as modules, inversion  
boxes, sealing glands, air  
tubes, stripper and bed plates, and  
needleboards. We may also suggest  
reconditioning the modules and in-  
version box whenever this is possi-  
ble after the check. In addition, we  
can offer you the option of installing  
a dedusting system to prevent  
fiber accumulation and a pneuma-  
tic board centering feature to sim-  
plify board setting.

## BENEFITS

- Long-term service support for each of our parts
- Extensive traceability of modules and inversion boxes
- Professional audit to verify your maintenance protocol, thus increasing the reliability and sustainability of your machine
- Optional dedusting system designed to simplify the cleaning processes
- Error-proofed board settings thanks to our pneumatic centering option
