

PRESS RELEASE

ANDRITZ to supply complete stock preparation line for wastepaper and special grades to Steinbeis Papier GmbH, Germany

GRAZ, JULY 5, 2022. International technology group ANDRITZ has received an order from Steinbeis Papier GmbH to supply a complete stock preparation line for conventional wastepaper and special grades, featuring a capacity from 78 to 200 t/d, for its mill in Glückstadt, Germany. Start-up is planned for the end of the first quarter of 2023.

The new line will process various types of raw material, such as wet-strength and coated paper grades, labels with high wet strength, wet beer-bottle labels, and plastic-laminated wastepaper. In close collaboration with the customer, ANDRITZ has developed a comprehensive and particularly flexible technological solution that can be adapted to suit the different raw material requirements in terms of pulping and reject content. The scope of supply comprises the entire key equipment – from pulper feeding to fine screening – as well as basic engineering, supervision of installation, and start-up.

Andreas Rauscher, CEO of Steinbeis Papier GmbH, says: *“With its products, Steinbeis Papier focuses on the principles of a resource-saving, circular economy. The latest product – called Steinbeis Label, a wet-strength and alkali-resistant label paper – brought about the idea of a new wastepaper processing line to create the preconditions for a closed-loop process in Glückstadt. Thus, wet-strength and alkali-resistant label paper can be recycled and used as the raw material for new label paper. The previously unused wastepaper volume that could not be processed using conventional methods and had to be incinerated can thus be made available to the recycling loop in future.”*

Steinbeis Papier GmbH in Glückstadt is the European market leader for graphic recycled papers made from 100% wastepaper. The product range comprises printing and copy paper, coated offset paper, as well as paper for digital printing and label paper. Steinbeis Papier GmbH is part of Steinbeis Holding, which unites various companies from ecological paper production, the circular economy, and environmentally friendly energy production under one roof

ANDRITZ GROUP

International technology group ANDRITZ offers a broad portfolio of innovative plants, equipment, systems, services and digital solutions for a wide range of industries and end markets. ANDRITZ is a global market leader in all four of its business areas – Pulp & Paper, Metals, Hydro, and Separation. Technological leadership, global presence and sustainability are the cornerstones of the group's strategy, which is focused on long-term profitable growth. The publicly listed group has around 27,100 employees and over 280 locations in more than 40 countries.

ANDRITZ PULP & PAPER

ANDRITZ Pulp & Paper provides sustainable technology, automation, and service solutions for the production of all types of pulp, paper, board and tissue. The technologies and services focus on maximum utilization of raw materials, increased production efficiency, lower overall operating costs as well as innovative decarbonization strategies and autonomous plant operation. Boilers for power generation, flue gas cleaning systems, various nonwoven technologies, panelboard (MDF) production systems, as well as recycling and shredding solutions for numerous waste materials also form a part of this business area. State-of-the-art IIoT technologies as part of Metris digitalization solutions complete the comprehensive product offering.
