

## PRESS RELEASE

# ANDRITZ to supply SMART power boiler remote service using Metris BOA web platform to the Netherlands

*GRAZ, JULY 14, 2022.* International technology group ANDRITZ has received a five-year SMART service contract from BMC Moerdijk in the Netherlands to supply a Metris BOA platform including KPI dashboards and boiler operator advisor apps as well as automatically generated performance reports.

The SMART power boiler service uses the Metris BOA web platform – developed by ANDRITZ – to build KPI dashboards and operator advisor apps based on live as well as historical data to optimize and analyze power plant processes and monitor the equipment installed.

The tailored operation advisor apps will actively support the operator in increasing the efficiency of the boiler, detect opportunities to improve consumption values, and help start processes according to operational needs. Furthermore, automatically generated daily and bi-monthly performance reports comparing current data with data from previous periods will provide information at a glance for overall management of the power plant. The Metris BOA platform will be integrated into the control architecture as a third layer of automation and control together with the boiler protection and plant automation systems (DCS).

This is the third time that a Metris BOA platform will be installed in an existing plant and demonstrates the need for support tools to improve operations in the power plant market.

ANDRITZ is proud to provide another step from digital advisor to digital operator for power boilers. The order is an important part of ANDRITZ's roadmap towards autonomous power boilers.

#### **ANDRITZ GROUP**

International technology group ANDRITZ offers a broad portfolio of innovative plants, equipment, systems, services and digital solutions for a wide range of industries and end markets. ANDRITZ is a global market leader in all four of its business areas – Pulp & Paper, Metals, Hydro, and Separation. Technological leadership, global presence and sustainability are the cornerstones of the group's strategy, which is focused on long-term profitable growth. The publicly listed group has around 27,100 employees and over 280 locations in more than 40 countries.

#### **ANDRITZ PULP & PAPER**

ANDRITZ Pulp & Paper provides sustainable technology, automation, and service solutions for the production of all types of pulp, paper, board and tissue. The technologies and services focus on maximum utilization of raw materials, increased production efficiency, lower overall operating costs as well as innovative decarbonization strategies and autonomous plant operation. Boilers for power generation, flue gas cleaning systems, various nonwoven technologies, panelboard (MDF) production systems, as well as recycling and shredding solutions for numerous waste materials also form a part of this business area. State-of-the-art IIoT technologies as part of Metris digitalization solutions complete the comprehensive product offering.
