

PRESS RELEASE

ANDRITZ at CINTe 2022 in China

GRAZ, JULY 15, 2022. International technology group ANDRITZ will be presenting its innovative nonwovens production solutions at CINTe 2022 in Shanghai, China (September 6–8, hall E1, booth C02) – one of the main trade fairs for technical textile and nonwoven products in Asia. ANDRITZ will show its broad product portfolio covering state-of-the-art nonwovens and textile production technologies such as air-through bonding, airlay, needlepunch, spunlace, spunbond, wetlaid/Wetlace™, converting, textile finishing, recycling, and natural fiber processing.

SUSTAINABILITY IS KEY

ANDRITZ supports nonwovens producers in the move to sustainability with the aim of reducing or eliminating plastic components while maintaining the high quality of the desired product properties. This applies to all types of sustainable wipes, such as flushable, biodegradable, bio-sourced, carded pulp or standard carded wipes. The latest development in this field is the ANDRITZ neXline wetlace CP line, which integrates the carded-pulp (CP) process. This is a fully engineered production line combining the benefits of drylaid and wetlaid technologies to produce a new generation of biodegradable wipes.

NEXLINE WETLAID aXcess TARGETS SMALLER AND MEDIUM PRODUCTION VOLUMES

The neXline wetlaid aXcess targets smaller and medium production volumes and has been devised for new and existing lines. The compact line provides the ideal entrance to the growing wetlaid market, with a variety of final applications and options. The line is easy and fast to ship due to the compact design, which also fits perfectly into containers. An operator-friendly configuration and versatile design ensure efficient production at affordable investment costs.

ANDRITZ aXcess DEVELOPED FOR MEDIUM CAPACITIES IN WUXI, CHINA

The aXcess range was specially developed at ANDRITZ (China) Ltd. Wuxi Branch to handle medium capacities. The facility in Wuxi has an experienced platform for production and service specially geared to serve the Asian nonwovens industry. It designs and manufactures cutting-edge lines to complement the ANDRITZ aXcess product range, which includes complete lines and individual machines for air-through bonding, needlepunch and spunlace processes. With the aXcess range, ANDRITZ has developed a hybrid line combining European and Chinese machines, which is the ideal combination to obtain the best added value from each component in the line and be very flexible to accommodate different business cases.

The service organization was set up to provide prompt delivery and excellent customer support, even during the COVID-19 pandemic. A team of technicians and process experts can be deployed quickly to customer sites requiring full-range assistance. The ANDRITZ facilities include a roll service center with state-of-the-art grinding equipment and a test stand for various types of rolls.

In addition, our aXcess range manufactured in Europe also offers technologies for spunlaid and wetlaid processes. Increasing production speeds and widths, compact and reliable design, and affordable investment costs are what customers look for in a competitive market environment. To meet these requirements ideally, we recently enhanced our nonwoven calender and dryer ranges.

MEET ANDRITZ ON SITE AND/OR ONLINE

ANDRITZ will be welcoming its customers in hall E1, booth C02, at the Shanghai New International Expo Centre on September 6–8, 2022. You can pre-register now to schedule your meetings in advance! [China International Trade Fair for Technical Textiles and Nonwovens \(eastfair.com\)](https://eastfair.com)

In addition, you can meet the ANDRITZ Nonwoven team online via Match Plus – Cinte's powerful online sourcing platform:

- All-in-one online platform to connect with international suppliers
- Virtual sourcing through business matching and meeting new business partners
- Instant messenger with video call function
- Schedule online meetings without the limitations of time and location
- 24/7 access during the 3-day event and after the fair
