## Höpperger successfully starts up ANDRITZ ADuro G granulator for e-scrap recycling

**ANDRITZ shredder technology enables sustainable recycling of e-scrap**

**GRAZ, SEPTEMBER 15, 2022.** Umweltschutz Höpperger has successfully completed the start-up of an ANDRITZ ADuro G-1600S granulator at its e-scrap recycling mill in Pfaffenhofen, Austria.

The new ADuro G-1600S granulator is equipped with additional wear protection for higher lifetime. The machine can be maintained easily, reducing downtimes to a minimum and thus achieving higher production. The granulator replaces an existing machine from another supplier.

Thomas Höpperger, General Manager, Höpperger Umweltschutz says: *„This investment helps us to reduce production downtimes significantly. Thus, we are saving valuable work time. In addition, we benefit from efficient maintenance work and higher productivity.”*

The company group Höpperger is a renowned Tyrolean family-owned enterprise that focuses on ecological and feasible recycling solutions. Höpperger processes at its mills in Pfaffenhofen and Rietz about 100,000 tons of various types of waste per year and runs an energy self-sufficient innovation center.

## **ANDRITZ GROUP**

International technology group ANDRITZ offers a broad portfolio of innovative plants, equipment, systems, services and digital solutions for a wide range of industries and end markets. ANDRITZ is a global market leader in all four of its business areas – Pulp & Paper, Metals, Hydro, and Separation. Technological leadership, global presence and sustainability are the cornerstones of the group's strategy, which is focused on long-term profitable growth. The publicly listed group has around 27,400 employees and over 280 locations in more than 40 countries.

## **ANDRITZ PULP & PAPER**

ANDRITZ Pulp & Paper provides sustainable technology, automation, and service solutions for the production of all types of pulp, paper, board and tissue. The technologies and services focus on maximum utilization of raw materials, increased production efficiency, lower overall operating costs as well as innovative decarbonization strategies and autonomous plant operation. Boilers for power generation, flue gas cleaning systems, various nonwoven technologies, panelboard (MDF) production systems, as well as recycling and shredding solutions for numerous waste materials also form a part of this business area. State-of-the-art IIoT technologies as part of Metris digitalization solutions complete the comprehensive product offering.
