

PRESS RELEASE

ANDRITZ to supply galvanizing furnace to Tatmetal (Tatçelik brand), Turkey

GRAZ, OCTOBER 5, 2022. International technology group ANDRITZ has received an order from Tatmetal (Tatçelik brand), Turkey, to supply a galvanizing furnace for a new coating line that will produce hot-rolled and cold-rolled material.

The line will provide hot-dip galvanized (GI), coated flat steel suitable for the automotive, durable goods, construction, energy, and mechanical engineering industries. Start-up of the line is scheduled for the first quarter of 2024.

The ANDRITZ scope of supply includes a direct-fired furnace (DFF) as well as radiant tube (RT) annealing and soaking sections, with compact and powerful cooling, as well as the after-pot cooling (APC) and post-treatment sections.

Ranked 31st among Turkey's 500 largest companies, Tatmetal focuses on providing value-added products by investing in high-quality production lines using innovative technologies. Tatmetal produces hot-rolled, pickled, cold-rolled, galvanized and painted flat steel under the Tatçelik brand. Automotive, durable goods, construction, energy, and mechanical engineering are the leading industries it serves.

This order confirms that ANDRITZ's strong market position on the Turkish market.

ANDRITZ GROUP

International technology group ANDRITZ offers a broad portfolio of innovative plants, equipment, systems, services and digital solutions for many different industries and end-markets. ANDRITZ ranks among the global market leaders in all four of its business areas – Pulp & Paper, Metals, Hydro, and Separation. Technological leadership, global presence, and sustainability are the main pillars of the company's business strategy for achieving long-term growth. The publicly listed group has around 27,400 employees and over 280 locations in more than 40 countries.

ANDRITZ METALS

ANDRITZ Metals is – via the Schuler Group – one of the world's leading suppliers of technologies, plants and digital solutions in sheet metal forming. The product portfolio also includes automation and software solutions, process know-how, and service. In the metals processing segment, the business area offers innovative and market-leading solutions for the production and processing of flat products, for welding systems, as well as furnaces and services for the metals processing industry.
