

PREVENTIVE MAINTENANCE FOR PLANT OPTIMIZATION

Services for VIB SprayTech

SPARE PARTS AND SERVICES

Highest quality standards and constant plant availability are essentials for paper producers nowadays. As with other key components, all spray nozzle components must be serviced

regularly in order to keep both production performance and also all quality parameters at a constant, high level. As a reliable and long-term partner, ANDRITZ offers you original spare parts and custom-

tailored services from a single source for all of your ANDRITZ VIB products – competent, fast and, above all, at an attractive price-performance ratio.

ANDRITZ

Audits and service packages

In order to guarantee the best possible spraying quality by your VIB SprayTech, ANDRITZ offers flexible service packages and audits:

PACKAGE I – SERVICE AUDIT

A service audit assesses the current technical status of the VIB SprayTech. A check is conducted on the digital valve cabinet and peripheral equipment (air and water supply). After completion of the audit, the customer receives a detailed report on the status of the plant as well as maintenance and service information. In addition, a list of recommended spare parts is compiled.

PACKAGE II – STANDARD SERVICE

The standard service package comprises cleaning of all air-water nozzles in an ultrasonic bath and replacement of the O-rings when the nozzles are reinstalled. The air filter, two new water filters and the respective O-rings are also replaced. In addition, a function check is conducted on the DHS and, for digital valves, the guide bushes, springs, valve stems and retaining clips are changed if necessary.

PACKAGE III – PREMIUM SERVICE

The premium service package contains a complete spare parts package for digital valves in addition to the standard services.

BENEFITS

- Ensures high plant availability
- Guarantees full plant functionality
- Avoids inefficient plant operation
- Optimizes maintenance costs
- Service and spare parts from the original equipment manufacturer
