

CLEAN AIR FOR A BETTER PLANET

Discover our wide range of technologies and services

ANDRITZ

REACH YOUR SUSTAINABILITY GOALS WITH ANDRITZ'S CLEAN AIR TECHNOLOGIES

ANDRITZ Clean Air Technologies is a global player in flue gas treatment solutions with a well-established network of local experts. We offer a broad portfolio of technologies in all major industries, covering new builds, upgrades, and retrofits, as well as a comprehensive range of services.

PARTICULATE MATTER CONTROL

Cyclones & Multi-Clones

Electrostatic Precipitator
Dry & Wet

Fabric Filter

ACID GAS CONTROL (SO₂, HCl, HF)

Spray Tower

Packed Bed

Venturi

VOC/HAP CONTROL

Regenerative
Thermal Oxidizer

Regenerative
Catalytic Oxidizer

HEAT RECOVERY

Flue Gas Condenser

Heat Exchanger

CO₂ CONTROL

Amine

Hot Potassium Carbonate*

Membrane

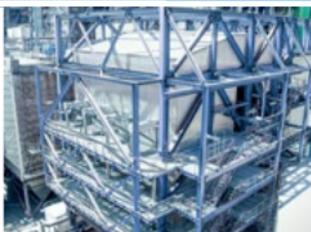

NO_x CONTROL

Selective Catalytic
Reduction

Scrubber

Hg/HEAVY METALS CONTROL

Activated Carbon
Injection

MULTI-POLLUTANT CONTROL (PM, acid gases, Hg, HM, ...)

Dry Sorbent Injection

TurboSorp, Turbo CDS

Novel Integrated
Desulphurization

Spray Dry Absorber

PNEUMATIC CONVEYING

Low- & High-Pressure
Equipment

Ancillary Products

MULTI-STAGE CLEANING SYSTEMS

Combination of various
technologies, such as
DeDust, DSI, DeSO_x,
DeNO_x, FGC, DeCarb
and more.

SERVICE

Inspection, Field Services

Spare Parts, SIR,
EcoTeq™ Filter Bags

Upgrades & Retrofits

Service Agreements

*under licence from Eickmeyer & Associates Inc.

We provide tailor-made environmental solutions focused on reducing emissions and improving performance and efficiency, helping you meet changing market conditions and comply with your asset strategies. Our offering covers the entire flue gas line to control particulate matter, SO_x and other acid gases, Hg and heavy metals, VOCs/HAPs, NO_x, and CO₂ emissions.

With our broad portfolio of best-available technologies for various industrial processes, combined with innovative engineering and strong project execution, ANDRITZ is the ideal partner to help you meet stringent emission regulations.

Regional proximity for service activities further ensures optimal operation and superior lifecycle performance of your key equipment and auxiliary components.
