ANDRITZ receives major rehabilitation order for Old Hickory hydropower plant, United States

GRAZ/VIENNA, FEBRUARY 23, 2023. U.S. Army Corps of Engineers' Nashville District awarded international technology group ANDRITZ a contract for rehabilitation of the turbines and generators at the Old Hickory hydroelectric power plant. The 162 MW power plant is located on the Cumberland River in Central Tennessee near the town of Hendersonville. Once fully commissioned, power generation is estimated to be about 565 GWh per year. Commissioning of the first unit is expected in August 2026.

The ANDRITZ scope of supply includes the design, manufacture, transport, erection, testing and commissioning of three Kaplan turbine generator units with a capacity of 40.5 MW each, along with associated auxiliaries and ancillary equipment, with an optional fourth unit. The contract will be executed by ANDRITZ's US subsidiary in Charlotte, North Carolina.

By securing this prestigious contract, ANDRITZ has further consolidated its position as a leading player in the United States' hydropower market.
