

PRESS RELEASE

ANDRITZ to supply energy-saving mechanical pulping line to Hubei Xianhe New Materials, China

GRAZ, MARCH 13, 2023. International technology group ANDRITZ has received an order from Hubei Xianhe New Materials Co., Ltd. to supply a chemi-thermomechanical pulping line with a capacity of 350 admt/d for its mill in Jingzhou City, Hubei Province, China.

ANDRITZ's scope of supply comprises the entire key equipment and supervision service for the mechanical installation, commissioning, start-up, and training.

With this contract ANDRITZ is consolidating its strong market position for low-energy hard wood mechanical pulping technology focusing on production of high-quality fibers at lowest operating cost.

Established in 2021, Hubei Xianhe New Materials is active in several business fields including the pulp and paper industry.

ANDRITZ GROUP

International technology group ANDRITZ offers a broad portfolio of innovative plants, equipment, systems, services and digital solutions for a wide range of industries and end markets. Sustainability is an integral part of the company's business strategy and corporate culture. With its extensive portfolio of sustainable products and solutions, ANDRITZ aims to make the greatest possible contribution to a sustainable future and help its customers achieve their sustainability goals. ANDRITZ is a global market leader in all four of its business areas – Pulp & Paper, Metals, Hydro and Separation. Technological leadership and global presence are cornerstones of the group's strategy, which is focused on long-term profitable growth. The publicly listed group has around 29,100 employees and over 280 locations in more than 40 countries.

ANDRITZ PULP & PAPER

ANDRITZ Pulp & Paper provides sustainable technology, automation, and service solutions for the production of all types of pulp, paper, board and tissue. The technologies and services focus on increased production efficiency, lower overall operating costs as well as innovative decarbonization strategies and autonomous plant operation.

The product portfolio also includes boilers for power generation, flue gas cleaning systems, various nonwoven technologies, and panelboard (MDF) production systems. With waste-to-value recycling, shredding and energy solutions, waste and by-product streams from production are converted into valuable secondary raw materials as well as into sustainable resources for energy generation. State-of-the-art IIoT technologies as part of Metris digitalization solutions complete the comprehensive product offering.
