ANDRITZ successfully started up FibreFlow drum pulping system at AHP

GRAZ, MARCH 14, 2023. ANDRITZ has successfully completed the start-up of a FibreFlow drum pulping system and reject handling equipment at Asia Honour Paper in Mentakab, Pahang Darul Makmur, Malaysia.

ANDRITZ installed a new FibreFlow drum pulper as well as reject handling equipment to upgrade production line PM21, processing a mixture of recycled fiber grades for manufacturing of newsprint, P&W (Printing and Writing) paper and LWB (Low Basis Weight Board).

Asia Honour Paper Industries (M) Sdn. Bhd. was established in 1999 as newspaper manufacturer and nowadays produces a broad range of high-quality paper products based on recycled fibers mainly for the Asian but also for the global market.

ANDRITZ GROUP

International technology group ANDRITZ offers a broad portfolio of innovative plants, equipment, systems, services and digital solutions for a wide range of industries and end markets. Sustainability is an integral part of the company's business strategy and corporate culture. With its extensive portfolio of sustainable products and solutions, ANDRITZ aims to make the greatest possible contribution to a sustainable future and help its customers achieve their sustainability goals. ANDRITZ is a global market leader in all four of its business areas – Pulp & Paper, Metals, Hydro and Separation. Technological leadership and global presence are cornerstones of the group's strategy, which is focused on long-term profitable growth. The publicly listed group has around 29,100 employees and over 280 locations in more than 40 countries.

ANDRITZ PULP & PAPER

ANDRITZ Pulp & Paper provides sustainable technology, automation, and service solutions for the production of all types of pulp, paper, board and tissue. The technologies and services focus on increased production efficiency, lower overall operating costs as well as innovative decarbonization strategies and autonomous plant operation.

The product portfolio also includes boilers for power generation, flue gas cleaning systems, various nonwoven technologies, and panelboard (MDF) production systems. With waste-to-value recycling, shredding and energy solutions, waste and by-product streams from production are converted into valuable secondary raw materials as well as into sustainable resources for energy generation. State-of-the-art IIoT technologies as part of Metris digitalization solutions complete the comprehensive product offering.
