

PRESS RELEASE

ANDRITZ to supply two high-speed hygiene converting lines to Predo, Türkiye

GRAZ, APRIL 25, 2023. International technology group ANDRITZ has received an order from Predo Health Products Inc, Türkiye, for delivery of two high-speed hygiene converting lines to produce adult open diapers and feminine sanitary napkins. With this investment, Predo is entering the growing adult and femcare market. The company already operates four baby diaper lines from ANDRITZ.

Ibrahim Uygur, owner of Predo, says: *“We have again placed our confidence in ANDRITZ as we are very satisfied with the installed lines and the first-class service. Especially during the difficult times we recently faced in Türkiye due to the earthquake, ANDRITZ supported us with perfect service. This enabled us to maintain our production level and serve our customers in time.”*

The two state-of-the-art lines are designed for high-speed production and contain the most advanced forming technology for absorbent core and SAP (superabsorbent polymers) dosing. Based on their flexibility and user-friendly configuration, Predo will be able to produce a wide range of different product compositions and sizes. In addition, the lines are designed for zero waste production. This will enable Predo to produce high-performing products with a sustainable approach.

The lines will be installed in Predo’s factory in Gaziantep, with start-up scheduled for the first half of 2024.

Predo is one of the leading manufacturers of baby care products and is expanding its business to other hygiene sectors. The company exports to 55 countries across the globe and scores with high quality production and constant developments.
