

PRESS RELEASE

ANDRITZ supplies a leading sugar producer in Hungary with a new biomass boiler

This investment is part of Hungrana's commitment to reducing its environmental impact while increasing its production capacities.

GRAZ, JUNE 20, 2023. Hungrana, a leading sugar producer based in Hungary, has recently invested in a tailor-made biomass boiler to support its operations. This investment is part of Hungrana's ongoing commitment to sustainability and reducing its environmental impact while increasing its production capacities.

ANDRITZ TEP d.o.o, a provider of complete power plant solutions and one of the leading European boiler manufacturers, was chosen for the design, production, delivery, associated civil works and erection of the boiler and all related equipment.

Hungrana already operates several boilers using different biomass fuels. The new wood chips boiler from ANDRITZ will further increase Hungrana's steam production capacity from renewable resources. Operating at 12 bar(g) and 220°C, it will add 32 tons of steam per hour. Thus, Hungrana is positioning itself as a leader in the industry, providing customers with high-quality products while reducing its usage of gas.

Boiler production will start in June, with the start of construction work planned for September.

"We are excited about this investment and the positive impact it will have on our business and the environment," said Zoltán Reng, CEO of Hungrana. "We are committed to sustainable practices and reducing our carbon footprint, and the biomass boiler is a significant step in that direction."

ANDRITZ TEP d.o.o. (former Duro Dakovic TEP d.o.o.) has extensive experience in the development of sustainable energy solutions, which played a crucial role in receiving this contract.

– End –

The new wood chips boiler from ANDRITZ will further increase Hungrana's steam production capacity from renewable resources.

ANDRITZ GROUP

International technology group ANDRITZ offers a broad portfolio of innovative plants, equipment, systems, services and digital solutions for a wide range of industries and end markets. Sustainability is an integral part of the company's business strategy and corporate culture. With its extensive portfolio of sustainable products and solutions, ANDRITZ aims to make the greatest possible contribution to a sustainable future and help its customers achieve their sustainability goals. ANDRITZ is a global market leader in all four of its business areas – Pulp & Paper, Metals, Hydro and Separation. Technological leadership and global presence are cornerstones of the group's strategy, which is focused on long-term profitable growth. The publicly listed group has around 29,700 employees and over 280 locations in more than 40 countries.

ANDRITZ PULP & PAPER

ANDRITZ Pulp & Paper provides sustainable technology, automation, and service solutions for the production of all types of pulp, paper, board and tissue. The technologies and services focus on increased production efficiency, lower overall operating costs as well as innovative decarbonization strategies and autonomous plant operation.

The product portfolio also includes boilers for power generation, flue gas cleaning systems, various nonwoven technologies, and panelboard (MDF) production systems. With waste-to-value recycling, shredding and energy solutions, waste and by-product streams from production are converted into valuable secondary raw materials as well as into sustainable resources for energy generation. State-of-the-art IIoT technologies as part of Metris digitalization solutions complete the comprehensive product offering.
