

PRESS RELEASE

ANDRITZ to supply complete OCC and reject treatment system for Infinya recycled paper mill

GRAZ, JULY 20, 2023. International technology group ANDRITZ has received an order from Infinya Containerboard Ltd. for a complete OCC line including reject treatment system for its recycled paper mill located in Hadera, Israel.

The OCC line will have a capacity of 1,080 bdmt per day and will use mixed OCC (old corrugated containers) as raw material to produce high-quality fluting and testliner for the Israeli market. The key equipment delivered by ANDRITZ includes the complete stock preparation line with a FibreFlow drum pulping system for gentle slushing and efficient removal of contaminants at minimum fiber loss.

ANDRITZ will install several of its proven *Prime* stock preparation products, such as *PrimeScreen X* screens for highly efficient screening and fractionation at significantly lower energy consumption. *PrimeFilter D* discfilter with advanced feed system will enable superior throughput and operation at reduced energy costs. The new reject treatment system will be equipped with a robust ADuro C shredder for highly efficient coarse shredding and ReCo reject compactors for dewatering the rejects to highest possible dry contents. The new OCC line will be equipped with an ANDRITZ distributed control system (DCS) and motor control center (MCC), which ensures optimal plant performance.

ANDRITZ will also provide field instruments, the basic and detail engineering, supervision of installation, commissioning and start-up service as well as the operator training. Start-up is planned for the third quarter of 2024.

Infinya, established in 1953, is the largest recycling and packaging company in Israel. The company specializes in recycling, cardboard paper production and packaging production.

ANDRITZ GROUP

International technology group ANDRITZ offers a broad portfolio of innovative plants, equipment, systems, services and digital solutions for a wide range of industries and end markets. Sustainability is an integral part of the company's business strategy and corporate culture. With its extensive portfolio of sustainable products and solutions, ANDRITZ aims to make the greatest possible contribution to a sustainable future and help its customers achieve their sustainability goals. ANDRITZ is a global market leader in all four of its business areas – Pulp & Paper, Metals, Hydro and Separation. Technological leadership and global presence are cornerstones of the group's strategy, which is focused on long-term profitable growth. The publicly listed group has around 29,700 employees and over 280 locations in more than 40 countries.

ANDRITZ PULP & PAPER

ANDRITZ Pulp & Paper provides sustainable technology, automation, and service solutions for the production of all types of pulp, paper, board and tissue. The technologies and services focus on increased production efficiency, lower overall operating costs as well as innovative decarbonization strategies and autonomous plant operation.

The product portfolio also includes boilers for power generation, flue gas cleaning systems, various nonwoven technologies, and panelboard (MDF) production systems. With waste-to-value recycling, shredding and energy solutions, waste and by-product streams from production are converted into valuable secondary raw materials as well as into sustainable resources for energy generation. State-of-the-art IIoT technologies as part of Metris digitalization solutions complete the comprehensive product offering.
